Gifts, Talents and Education Barry Hymer, Jack Whitehead, Marie Huxtable, 2008-09-15 *Gifts Talents and Education A Living Theory Approach* is a practical guide for teachers on how to help all their pupils to enhance their gifts and talents in the classroom. Examples reveal how teachers can transform the way education is understood in schools by relating stories of how they learned about their own gifts and talents. The book explains recent key developments in multimedia representations of social and emotional aspects of learning. These permit the multi-sensory gifts and talents of individual learners to be recognised and developed within a process that enhances the emotionally literate space of enquiring classrooms. *Gifts Talents and Education* assumes a capability approach to human development which rests on enabling individuals to realise their gifts and talents within a co-created sense of the common good. The book offers values, skills and understanding as concepts that retain a direct connection with practice. The stories are grounded in the lives of practitioner-researchers who show the lived meanings of these ideas as they are realised in practice, asking questions such as: how do I improve what I am doing and how do I live my values more fully in practice.

Gifted & Talented Pocketbook Barry Hymer, 2015-09-16 Gifted and talented education is at a crossroads. Turn right and speed off down the motorway only to be frustrated by the rush-hour traffic of identification strategies, tests, labels, targets and anxious children. Turn left on to the road less travelled and there's no crazed rush to a destination, rather a journey during which you can stop off frequently, take in the views and enjoy the sensations and experiences that come with a focus on the processes, not just the products of learning. The *Gifted Talented Pocketbook* turns left at the crossroads. Using cartoons, diagrams and visual prompts to support the text, it offers teachers a coherent framework for G/T education, including five learning tools for running classrooms where all pupils are stretched, challenged and motivated, and where gifts are created and grown, not identified and measured. The book considers definitions of giftedness, whether gifts are caught or taught, and whether giftedness is fixed or malleable. It highlights the role of intrinsic learning motivation when it comes to achieving high levels of success. The GRACE framework: Grow, Relate, Act, Challenge, Exert, offers ideas for lessons, implications for policy and explains how to use five learning tools to stimulate considered, reflective learning. Logo, Visual Thinking, Philosophy for Children, Thinking Actively in a Social Context, Dilemma Based Learning and Living Theory Action Research. Author Barry Hymer, a former teacher and ed psych, is now a consultant and trainer in the field of gifted and talented education. He is consultant editor of *Gifted Education International* and a visiting fellow at Newcastle University's Centre for Learning and Teaching.
