

Social Interaction in Everyday Life

- Social interaction is *the process by which people act and react in relation to others*
- In every society, people build their everyday lives using the idea of **status**, *a social position that a person holds*
- Status is part of our social identity and helps define our relationship to others
- An ascribed status is *a social position a person receives at birth or takes on involuntarily later in life* (examples: being a daughter, a Greek, a teenager)
- By contrast, an achieved status refers to a social position a person takes on voluntarily that reflects personal ability and effort (examples: honors student, nurse, thief)
- A master status is a status that has special importance for social identity, often shaping a person's entire life (examples: job, gender, name, being in the Bush family attracts attention)
