Environmental Disaster Alert:

Environmental Disaster Alert! Paul Clarence Challen, 2005 Most disasters are caused by nature but occasionally humans are to blame for catastrophic influences on the world's air water soil and natural resources Environmental Disaster Alert probes the causes and effects of acid rain greenhouse gases oil spills air pollution and other human caused disasters A Proposed Nationwide Natural Disaster Warning System (NADWARN) United States. Natural Disaster Warning Survey Group, United States. Environmental Science Services Administration, 1965 Environmental Disaster Alert! Paul Challen, Bobbie Kalman, 2004-09-01 For use in schools and libraries only Features the science behind these destructive man made disasters and tells how societies around the world cope with such events as the Exxon Valdez oil spill the Bhopal chemical explosion and the Chernobyl nuclear disaster *Environmental Hazards* Keith Smith, Carina J. Fearnley, Deborah Dixon, Deanne K. Bird, Ilan Kelman, 2023-11-29 The seventh edition of Environmental Hazards provides a much expanded and fully up to date overview of all the extreme environmental events that threaten people and what they value in the 21st century globally It integrates cutting edge materials to provide an interdisciplinary approach to environmental hazards and their management illustrating how natural and human systems interact to place communities of all sizes and at all stages of economic development at risk Part 1 defines basic concepts of hazard risk vulnerability and disaster and explores the evolution of hazards theory Part 2 employs a consistent chapter structure to demonstrate how individual hazards occur their impacts and how the risks can be assessed and managed This extensively revised edition includes Fresh perspectives on the reliability of disaster data disaster risk reduction risk and disaster perception and communication and new technologies available to assist with environmental hazard management The addition of several new environmental hazards including landslide and avalanches cryospheric hazards karst and subsidence hazards and hazards of the Anthropocene More boxed sections with a focus on both generic issues and the lessons to be learned from a carefully selected range of up to date extreme events An annotated list of key resources including further reading and relevant websites for all chapters More colour diagrams and photographs and more than 1 000 references to some of the most significant and recent published material New exercises to assist teaching in the classroom or self learning This carefully structured and balanced textbook captures the complexity and dynamism of environmental hazards and is essential reading for students across many disciplines including geography environmental science environmental studies and natural resources *Environmental Hazards Methodologies for Risk Assessment and Management* Nicolas R. Dalezios, 2017-02-15 From the beginning of 21st century there has been an awareness of risk in the environment along with a growing concern for the continuing potential damage caused by hazards In order to ensure environmental sustainability a better understanding of natural disasters and their impacts is essential It has been recognized that a holistic and integrated approach to environmental hazards needs to be attempted using common methodologies such as risk analysis which involves risk management and risk assessment

Indeed risk management means reducing the threats posed by known hazards whereas at the same time accepting unmanageable risks and maximizing any related benefits The risk management framework involves evaluating the importance of a risk either quantitatively or qualitatively Risk assessment comprises three steps namely risk identification data base event monitoring statistical inference risk estimation magnitude frequency economic costs and risk evaluation cost benefit analysis Nevertheless the risk management framework also includes a fourth step risk governance i e the need for a feedback of all the risk assessment undertakings There is currently a lack of such feedback which constitutes a serious deficiency in the reduction of environmental hazards This book emphasises methodological approaches and procedures of the three main components in the study of environmental hazards namely forecasting nowcasting before monitoring during and assessment after based on geoinformatic technologies and data and simulation through examples and case studies These are considered within the risk management framework and in particular within the three components of risk assessment namely risk identification risk estimation and risk evaluation This approach is a contemporary and innovative procedure and constitutes current research in the field of environmental hazards Environmental Hazards Methodologies for Risk Assessment and Management covers hydrological hazards floods droughts storms hail desertification biophysical hazards frost heat waves epidemics forest fires geological hazards landslides snow avalanches tectonic hazards earthquakes volcanoes and technological hazards This book provides a text and a resource on environmental hazards for senior undergraduate students graduate students on all courses related to environmental hazards and risk assessment and management It is a valuable handbook for researchers and professionals of environmental science environmental economics and management and engineering Editor Nicolas R Dalezios University of Thessaly Greece

Early Warning Systems for Natural Disaster Reduction Jochen Zschau,2003 Written for a broad audience this book offers a comprehensive account of early warning systems for hydro meteorological disasters such as floods and storms and for geological disasters such as earthquakes One major theme is the increasingly important role in early warning systems played by the rapidly evolving fields of space and information technology The authors all experts in their respective fields offer a comprehensive and in depth insight into the current and future perspectives for early warning systems The text is aimed at decision makers in the political arena scientists engineers and those responsible for public communication and dissemination of warnings

Natural Disaster Warning System for High-Speed Railway Safety Operation Qizhou Hu,2023-11-24 This book explores the mechanisms behind high speed railway HSR traffic accidents caused by natural disasters employing the concept of dynamic tracking situation assessment and early warning management It establishes a natural disaster warning system for ensuring the safety of HSR operations while providing insightful management measures and methods that address the challenges posed by natural disasters By analyzing the current state and objective circumstances of HSR safety operations this book distinguishes itself from similar publications both domestically and internationally It conducts an in depth analysis

of the safe operation of high speed railways by adopting a systems science approach that effectively merges theory with practical applications Furthermore the book explores the developmental trajectory of high speed railways and investigates the determination of their safe operation It comprehensively evaluates the safety of high speed railway operations by employing mathematical theories of uncertainty subsequently presenting detailed measures to effectively tackle safety concerns related to high speed railways Disaster Warning System: Satellite Feasibility and Comparison with Terrestrial Systems.
