Lost in Dialogue Giovanni Stanghellini, 2017 In this book, Stanghellini argues that to be human means to be in dialogue with alterity; that mental pathology is the outcome of a crisis of one's dialogue with alterity and that care is a method wherein dialogues take place whose aim is to re-enact interrupted dialogue with alterity within oneself and with the external world.

Retrofitting Blade Runner Judith Kerman, 1991 This book of essays looks at the multitude of texts and influences which converge in Ridley Scott's film *Blade Runner*, especially the film's relationship to its source novel, Philip K. Dick's *Do Androids Dream of Electric Sheep?* The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These essays consider political, moral, and technological issues raised by the film, as well as literary, filmic, technical, and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues, and the roots of the film in *Paradise Lost*, *Frankenstein*, detective fiction, and previous science fiction cinema.

Stereodynamics of Molecular Systems Ramaswamy H. Sarma, 2013-10-22 *Stereodynamics of Molecular Systems* covers the proceedings of a symposium held at the State University of New York at Albany on 23-24 April 1979. The book focuses on the stereodynamics of molecules and ions and nucleic acid structure. The contributions tackle spectroscopy, crystallography, perturbations, and electron transfer reactions. The selection first offers information on nuclear magnetic resonance spectroscopy, chemical shifts, coupling constants, and molecular geometry, including chemical shifts, bond coupling constants, and constitutional features of nucleic acids. The book then takes a look at nuclear magnetic resonance spectroscopy, stereodynamics of small molecules, nuclear magnetic resonance spectroscopy, solution dynamics of polymer chains, and single crystal crystallography. The publication evaluates the steric effects on electron transfer reactions of sulfonamides, effects of isotopic perturbation on NMR spectra, and conformational mobility of the backbone of cyclic tripeptides. The book also discusses accessible surface areas of nucleic acids and their relation to folding, conformational transition, and protein recognition. Topics include polarity of exposed atoms, surface of DNA double

helices transfer RNA and calculation of static accessible surface area The selection is a dependable reference for readers interested in the stereodynamics of molecules and ions and nucleic acid structure *Reprint B. Bell Telephone*

Laboratories,1926 *Homicide* Martin Daly,Margo Wilson,1988-01-01 This book is an exercise in evolutionary psychology the attempt to understand normal social motives as products of the process of evolution by natural selection There is simply no question that this is the process that created the human psyche and yet psychologists seldom ask what implications this fact might have for their discipline We think that the implications are many and profound touching on such matters as parental affection and rejection sibling rivalry sex differences in interests and inclinations social comparisons and achievement motives our sense of justice lifespan developmental changes in attitudes and that phenomenology of the self

Canones: The Art of Harmony Alessandro Bausi,Bruno Reudenbach,Hanna Wimmer,2020-11-23 The so called Canon Tables of the Christian Gospels are an absolutely remarkable feature of the early late antique and medieval Christian manuscript cultures of East and West the invention of which is commonly attributed to Eusebius and dated to first decades of the fourth century AD Intended to host a technical device for structuring organizing and navigating the Four Gospels united in a single codex and in doing so building upon and bringing to completion previous endeavours the Canon Tables were apparently from the beginning a highly complex combination of text numbers and images that became an integral and fixed part of all the manuscripts containing the Four Gospels as Sacred Scripture of the Christians and can be seen as exemplary for the formation development and spreading of a specific Christian manuscript culture across East and West AD 300 and 800 In the footsteps of Carl Nordenfalk s masterly publication of 1938 and few following contributions this book offers an updated overview on the topic of Canon Tables in a comparative perspective and with a precise look at their context of origin their visual appearance their meaning function and their usage in different times domains and cultures **Science** John
