Parallel Algorithms for Irregular Problems:

State of the Art Alfonso Ferreira, José Rolim, 2013-04-17 Efficient parallel solutions have been found to many problems Some of them can be obtained automatically from sequential programs using compilers However there is a large class of problems irregular problems that lack efficient solutions IRREGULAR 94 a workshop and summer school organized in Geneva

addressed the problems associated with the derivation of efficient solutions to irregular problems This book which is based on the workshop draws on the contributions of outstanding scientists to present the state of the art in irregular problems covering aspects ranging from scientific computing discrete optimization and automatic extraction of parallelism Audience

Efficient Parallel Algorithms Can

be Made Robust Paris C. Kanellakis, Alex A. Shvartsman, 1989 Abstract The efficient parallel algorithms proposed for many fundamental problems such as list ranking computing preorder numberings on trees and integer sorting are very sensitive to processor failures The requirement of efficiency commonly formalized using Parallel time \times Processors as a cost measure has led to the design of highly tuned PRAM algorithms which given the additional constraint of simple processor failures

unfortunately become inefficient or even incorrect We propose a new notion of robustness that combines efficiency with fault tolerance *Efficient Parallel Algorithms for Some NP-complete Problems on Series-parallel Graphs* Arobinda Gupta, 1992

Efficient parallel algorithms for two graph layout problems Xin He, 1991 Abstract We present efficient parallel algorithms

for solving two graph layout problems Find a F ry Embedding on a grid and construct a rectangular dual for planar graphs

The algorithm for the first problem takes $O(\log n \log^{\superscript n} n)$ time with $O(n)$ processors on a PRAM The algorithm for the

second problem takes $O(\log^2 n)$ time with $O(n)$ processors
