## **Global Ethnopolis:**

*The Global Ethnopolis* M. Laguerre, 1999-10-11 This book focuses on three ethnic neighbourhoods in San Francisco commoditized Chinatown gentrified Japantown and defunct Manilatown and argues that the city is global because it comprises a multiplicity of global niches in its midst that interface with and sustain each other at the local level

*The Global Ethnopolis* NA NA, 2000-01-30 This book focuses on three ethnic neighbourhoods in San Francisco commoditized Chinatown gentrified Japantown and defunct Manilatown and argues that the city is global because it comprises a multiplicity of global niches that interface with and sustain one another at the local level According to the author these enclaves are not simply transnational communities but rather global ethnopolis They must be seen within the logic of globalization and not simply that of transnationality The early emphasis on transnationality is misplaced because it looks at the process and not the outcome Transnationality is the means by which or the conduit through which the global ethnopolis is produced The focus here is on various processes of border crossing practices connections and flows in order to examine the globalized locality and the localized globality Any theory of transnationality presupposes a theory of globalization In other words transnationality is the process by which globality is effected This new approach of studying ethnic enclaves within the framework of globalization theory forces us to connect local activities and processes to a much larger universe However the view that diasporic communities maintain transnational relations with their homelands is not new though only recently have social scientists begun to unravel their various layers of interconnectedness What is needed now is not simply a description of the enclave homeland relationship but also an analysis and comparison of the transnational modalities of incorporation operation and reproduction of these ethnopolis as well as the global city status that is the hallmark of their identity

*Contemporary Ethnic Geographies in America* Christopher A. Airriess, 2015-09-28 Ethnic diversity has marked the United States from its inception and it is impossible to separate ethnicity from an understanding of the United States as a country and Americans as a people Since the 1965 Immigration and Nationality Act the United States has experienced watershed transformations in its social cultural and ethnic geographies Considering the impact of these wide ranging changes this unique text examines the experiences of a range of ethnic groups in both historical and contemporary context It begins by laying out a comprehensive conceptual framework that integrates immigration theory globalization transnational community formation and urban cultural and economic geography The contributors then present a rich set of case studies of the key Latin American Asian American and Middle Eastern communities comprising the vast majority of newer immigrants Each case offers a brief historical overview of the group's immigration experience and settlement patterns and discusses its contemporary socioeconomic dynamics All these communities have transformed and been transformed by the places in which they have settled Exploring these changing communities places and landscapes this book offers a nuanced understanding of the evolution of America's contemporary ethnic geographies
