## **Global Intelligence And Human Development:**

Global Intelligence and Human Development Mihai Spariosu,2004 Proposes an innovative approach to globalization based on an ethics of global awareness

**Rebuilding the Profession** Dorothy Figueira,2020-01-20 This volume is meant to be a retrospective look at the field of Comparative Literature as it has developed in the past two decades as well as a reflection on its future direction if it is to remain relevant and innovative as a field of study From its inception in the second half of the twentieth century Comparative Literature in the US has been conceived as a cross disciplinary cross national and crosscultural enterprise that brings together theoretical developments in the Humanities and Social Sciences to reflect on the most important intellectual and cultural trends from a comparative perspective through the lens of literary studies Most of the founders of Comparative Literature were distinguished European scholars who sought a safe haven from the ravages of World War II and its aftermath and who understandably focused on the Western literary intellectual and cultural tradition which at the time was in danger of being annihilated by the onslaught of Fascism and Communism With the advent of the age of globalization the field of Comparative Literature has become increasingly diverse and must therefore be reoriented and recognized accordingly

The Quantum Relations Principle Hardy F. Schloer,Mihai I. Spariosu,2016-11-07 Drawing extensively on the current critical state of affairs at the global level this book highlights the vital importance of systemic thinking and integrated transformative knowledge in bringing about a paradigm shift from fragmented linear ways of thinking to holistic ones based on the interconnectedness of the web of life It offers a comprehensive vision and innovative solutions for a sustainable future of our planet combining traditional wisdom with advanced scientific knowledge and high end state of the art information technology This integration of resources is the premise for the planetary wisdom we so deeply need in order to transform the present global crisis into an opportunity for further human development

Early Experience and Human Development Theodore D. Wachs,Gerald E. Gruen,2012-12-06 Our goal in writing this book was to fill a perceived gap in the early experience literature Most existing volumes on early experience and development can be dichotomized on a basic versus an applied dimension Volumes falling on the basic side are designed for researchers and theoreticians in the biomedical and behavioral sciences Most existing basic volumes are either primarily based on infrahuman data or are based on single major human studies In going over these volumes we are not convinced of the generality of infrahuman data to the human level in addition we were concerned about the replicability of findings from single studies however well designed these studies were As a result the relevance of data from these volumes to applied human problems is quite limited In contrast volumes falling on the applied side are designed primarily for those involved in intervention work with infants and young children These applied books generally tend to be vague and nonempirical compilations of the views of experts and the collective wisdom of the ages Rarely in applied volumes do we find conclusions based on solid consistent empirical findings

Weighting Differences Vasile Boari,Sergiu Gherghina,2009-05-27

Irrespective of the level of analysis identity remains a vague concept slippery and insufficiently elaborated and defined Be it individual or collective ethnical or social local or general regional e g the EU or global identity is a recurrent subject in political debates Situated on the edge of history anthropology sociology political science and psychology it increasingly becomes a leading paradigm in the area of social sciences Starting from the broader European perspective this volume has a multidisciplinary approach and gathers relevant works of internationally renowned scholars who tackle questions related to the Romanian identity Who are the Romanians What is the essence of their identity and how has it evolved along history What are their primary qualities and flaws How do Romanians perceive their Europeanness and how do they assume their European condition With no claim to unique answers the book provides a multi layered view of what Romanian identity means in contemporary period and how it develops in the broader European context By challenging the common sense understanding of identity we raise even more questions to be answered by further research

**Multidimensional Threats and Regional Responses to Caribbean Security** Wendy C. Grenade, 2024-12-20

Multidimensional Threats and Regional Responses to Caribbean Security assesses the prevalence and intensity of intersecting security threats such as transnational organized crime pandemics and climate change on the state of the Caribbean Community CARICOM The interplay of these various threats can adversely affect small island developing states SIDS This book aims to expose the fault lines in Western centric international relations which neglects non military issues non state actors and other security issues affecting SIDS This volume also explores the efficacy of security regionalism for SIDS where multiple actors cooperate across different levels and pool sovereignty resources and capabilities within legitimate institutional structures in order to prepare for prevent and collectively respond to severe security threats This book argues for a more inclusive global IR that considers the realities of the developing world and a reimagining of security regionalism among CARICOM SIDS

*The ex-ante regulation of artificial intelligence in Ethiopia* Hiwot Degu, 2019-07-15

Master s Thesis from the year 2019 in the subject Sociology Culture Technology Nations grade very good Ethiopian Civil Service University leadership and good governance course Law language English abstract Artificial intelligence is one of the newly emerging technologies which are creating new challenges to the existing laws and raising serious survival questions Regarding the relation of artificial intelligence and the law there are serious concerns on how the law regulates artificial intelligence as it is now being more

difficult for traditional public regulatory bodies to control the development of AI. Some form of regulation is likely necessary to protect society from harm. Due to the power and complexity of this new emerging technology, regulation can indeed be very impactful but it also carries risks. This thesis tried to solve this difficulty and examined different issues to answer whether artificial intelligence should be regulated or not and if so which basic principles should be followed and who are the suitable organs to regulate it. It also demonstrated the intricacy of this newly emerging technology as it has its own positive and negative consequences on the life of the society. Since the AI technology is prevailing constantly from time to time and its involvement is increasing in every aspect of activities such as factories or hospitals, the particular research emphasized the need for the development of AI that reconciles with its ethical, legal as well as social issues. To this end, the issue of ex ante regulation was underscored as a necessity to handle the potential challenges of AI in a formal way.
