Geopolitics In A Changing World:

Geopolitics in a Changing World Klaus Dodds, 2000 Developing examples drawn from the last 50 years of world politics this volume provides a progressive introduction to world politics It illustrates how forces such as globalisation are changing the traditional subject matter of geopolitics *Geopolitics* John Rennie Short, 2021-08-25 In this cogent introduction to the state of contemporary geopolitics Short provides an understanding of the basic themes of geopolitics and an overview of geopolitical issues around the globe His regional approach to the study of the power relations between states is framed by a discussion of critical and popular geopolitical analysis *Geopolitics at the End of the Twentieth Century* Nurit Kliot, David Newman (geopolitico.), 2002 **Petros Brailas-Armenis** E. Moutsopoulos, 1974 **Geopolitics** Jason Dittmer, Jo Sharp, 2014-06-27 It has been increasingly impossible to think about our changing world without coming across the term geopolitics In the wake of the invasion and occupation of Iraq by the United States United Kingdom and others geopolitics has been offered as an explanation for the occupation s failure to reinvent the Iraqi state and as a blueprint for future action But what is geopolitics Drawing both on academic and political material this book introduces readers to the concept of geopolitics from the first usage of the term to its more recent reconceptualisations The concept of geopolitics is introduced through four thematic sections Imperial Geopolitics Cold War Geopolitics Geopolitics after the Cold War and Reconceptualising Geopolitics Each section includes key writings from a range of diverse and leading authors such as Said Agnew Dalby O Tuathail Gregory Barnett and Kaplan and is accompanied by a critical introduction by the editors to guide the reader through the material This Reader establishes the foundations of geopolitics while also introducing readers to the continuing significance of the concept in the 21st century This Reader provides an essential resource that exposes students to original writing The Editors provide a pathway through the material with Section Introductions to assist the readers understanding of the context of the material and impacts of the writings The readings included draw from a range of authors writing from a range of locations The Reader concludes with the latest changes in geopolitical thought incorporating feminist and other perspectives **Questioning Geopolitics** Georgi M. Derluguian, Scott L. Greer, 2000-08-30 This volume takes an enlightened step back from the ongoing discussion of globalization The authors reject the notion that globalization is an analytically useful term Rather this volume shows globalization as merely the framework of the current political debate on the future of world power Some of the many other novel ideas advanced by the authors include the explicit prediction that East Asia is not going to become the center of the world the contention that the USSR collapsed for the same reasons that nearly brought down the United States in 1973 and the notion that the regional economic networks that are emerging from under the modern states are in fact rather old formations The articles in the volume are organized around three main themes Part One explores both the changing patterns of global power from the viewpoint of geopolitics and the Gramscian approach to the study of international relations Part Two further develops the debate among a number of eminent historians and

sociologists challenging both the apologists for and the opponents of globalization in new and unexpected ways Part Three traces the emergence of regional economic networks and explores the ambiguous problems of security and identity posed by the old new transborder formations

Geopolitics and Geoculture Immanuel Maurice Wallerstein,1991-07-26 Written between 1982 and 1989 this collection contains the author's perspective on the events of this period The book also charts the development of a challenge to the dominant geoculture the cultural framework within which the world system operates

Boundaries, Territory and Postmodernity David Newman,1999 Contributions to this collection seek to determine the extent to which states and boundaries have in fact disappeared or are simply changing their functions as we move from an era of fixed territories into a post Westphalian territorial system A group of international political geographers and political scientists examine the changing nature of the state pointing to significant changes on the one hand but equally noting the continued importance of territory and boundaries in determining the political ordering of the post modern world

Rule-Makers or Rule-Takers? Jacques Pelkmans,Daniel S. Hamilton,2015-08-24 The Transatlantic Trade and Investment Partnership TTIP is an effort by the United States and the European Union to reposition themselves for a world of diffuse economic power and intensified global competition It is a next generation economic negotiation that breaks the mould of traditional trade agreements At the heart of the ongoing talks is the question whether and in which areas the two major democratic actors in the global economy can address costly frictions generated by their deep commercial integration by aligning rules and other instruments The aim is to reduce duplication in various ways in areas where levels of regulatory protection are equivalent as well as to foster wide ranging regulatory cooperation and set a benchmark for high quality global norms In this volume European and American experts explain the economic context of TTIP and its geopolitical implications and then explore the challenges and consequences of US EU negotiations across numerous sensitive areas ranging from food safety and public procurement to economic and regulatory assessments of technical barriers to trade automotive chemicals energy services investor state dispute settlement mechanisms and regulatory cooperation Their insights cut through the confusion and tremendous public controversies now swirling around TTIP and help decision makers understand how the United States and the European Union can remain rule makers rather than rule takers in a globalising world in which their relative influence is waning
