explosion of interest in research and education in causal inference due to its wide applications in biomedical research social sciences artificial intelligence etc This textbook based on the author s course on causal inference at UC Berkeley taught over the past seven years only requires basic knowledge of probability theory statistical inference and linear and logistic regressions It assumes minimal knowledge of causal inference and reviews basic probability and statistics in the appendix It covers causal inference from a statistical perspective and includes examples and applications from biostatistics and econometrics Key Features All R code and data sets available at Harvard Dataverse Solutions manual available for instructors Includes over 100 exercises This book is suitable for an advanced undergraduate or graduate level course on causal inference or postgraduate and PhD level course in statistics and biostatistics departments **A First Course in Statistical Method** George Irving Gavett,1925 **A First Course in Statistics** D.
