Questions:

1. What is a slide "Transition"?

Switching a presentation, or slide transition is the visual effect that occurs when you move from one slide to the next.

2. Why wouldn't you have your entire self-designed logo on the slide?

When adding transitions, use the same one each time. If you use different transitions all the time, your presentation will look like a real mess and be unprofessional for your audience.

3. What is an Animation?

Adding life to any object in a program- graphics or text animation is all about.

4. What is the Animation Pane?

The Animation Pane lets you see and manage all active effects on the current slide.

5. How many animation styles should be applied to a presentation? One style, 10 styles or 50 styles? Explain.

Just one will be the most desirable as the types of animation. If you use a variety of animations, your presentation will look strange, messy and unprofessional.

6. What are Animations?

The PowerPoint animation feature lets you, the presenter, interact with your content during presentations. You can accomplish this by combining a presentation in Slide Show mode.
