Waxman, Herbert J. Walberg, 1991 *New England Journal of Education*, 1917 **Breaking Through to Effective Teaching** Patricia Martinez-Miller, Lauren Cervone, 2008 School leaders search for effective and practical ways to live out what research tells us makes a difference in student learning Research literature is easy to embrace theoretically but it is much more difficult to

turn research into compelling collective action How do we create the climate where the trusting members of a professional learning community improve the results of their practice What does it take to be the small learning community that includes students and parents as well as professional educators What will we do to harness the positive power of community to transform the learning and achievement of all students This walk through protocol provides both a process and a tool for inquiry based professional development community engagement and ultimately student self direction It starts with a school s commitment to build an inquiry model that assumes the capacity for extraordinary learning on the part of students teachers administrators and families The protocol can be employed narrowly to guide the improving practice of a couple of teachers with a passion for biology for example or more broadly Many of the improving schools highlighted in the chapters of this book chose the walk through protocol as a frame for school wide professional development that led to exceptional growth in learning and student achievement This process allows schools to create a community where all members approach learning as an inquiry and are proactive designers of their success

Efficient and Effective Teaching Rachel Elizabeth Metcalfe,2014 The purpose of this descriptive case study was to assess the relationship between the explicit instruction model and students academic success at Cook Elementary School in Garden Grove Unified School District The researcher hypothesized that student test scores would increase if taught in an explicit instruction format This study looked into different factors that go into making the explicit instruction used at Cook Elementary School CES so coherent The tenets of three research questions were addressed The first question was do students test scores improve when students are taught in an explicit instruction format The CST data gathered from two schools showed an increase of student achievement in mathematics and Language Arts One school raised the percent of students performing proficient and advanced in Language Arts by 7% and in mathematics only dropped in score by 1% between the 2010 2013 school years The second question researched what explicit instruction encompasses in schools 90% of those surveyed either agreed or strongly agreed that explicit instruction improved student achievement in math The researcher analyzed data on teacher s perceptions of understanding and communication and 100%a stated that student outcomes were clear to them and 90% stated that outcomes were clear to students The last question researched was what key factors are associated with an explicit instruction model at Cook Elementary School All ten Cook Elementary School teachers stated that they had attended a course or a workshop within the last eighteen months Of the twenty teachers surveyed CES was the only school that had done observation visits to other schools in order to gain information and knowledge on explicit instruction At CES teachers spent time collaboration with another on a weekly basis and analyzed test results to improve their instruction All Cook Elementary teachers stated that they participated in mentoring and or peer observation and coaching while teachers from the other three schools clearly stated that observation and mentoring were not part of their school culture After completing a questionnaire the researcher analyzed the extent to which student test scores improved on the California State Test CST

when taught in and explicit instruction format The researcher administered the questionnaire to teachers from four schools in Southern California The researcher was looking for common threads upon which to base recommendations to assist schools The research in this study illustrated that explicit instruction along with professional development teacher collaboration daily use of engagement strategies and immediate feedback from principal improved student learning It was not just explicit instruction that made for effective and efficient teaching but many aspects supplemented with explicit instruction
