Historians of the American West perhaps inspired by NAFTA and Internet communication are expanding their intellectual horizons across borders north and south This collection of essays functions as a how to guide to comparative frontier research in the Americas Frontiers specialist Richard W Slatta presents topics techniques and methods that will intrigue social science professionals and western history buffs alike as he explores the frontiers of North and South America from Spanish colonial days into the twentieth century The always popular cowboy is joined by the fascinating gaucho llanero vaquero and charro as Slatta compares their work techniques roundups songs tack lingo equestrian culture and vices We visit saloons and pulperias as well as plains and pampas and Slatta expertly compares clothing weather terrain diets alcoholic beverages card games and military tactics From primary records we learn how Europeans Native Americans and African Americans became the ranch hands cowmen and buckaroos of the Americas and why their dependence on the ranch cattle industry kept them bachelors and landless peons

Parker, Lars Rodseth, 2005-10

Despite a half century of attempts by social scientists to compare frontiers around the world the study of these regions is still closely associated with the nineteenth century American West and the work of Frederick Jackson Turner As a result the very concept of the frontier is bound up in Victorian notions of manifest destiny and rugged individualism The frontier it would seem has been tamed This book seeks to open a new debate about the processes of frontier history in a variety of cultural contexts untaming the frontier as an analytic concept and releasing it in a range of unfamiliar settings Drawing on examples from over four millennia it shows that throughout history societies have been formed and transformed in relation to their frontiers and that no one historical case represents the normal or typical frontier pattern The contributors historians anthropologists and archaeologists present numerous examples of the frontier as a shifting zone of innovation and recombination through which cultural materials from many sources have been unpredictably channeled and transformed At the same time they reveal recurring processes of frontier history that enable world historical comparison the emergence of the frontier in relation to a core area the mutually structuring interactions between frontier and core and the development of social exchange merger or conflict between previously separate populations brought together on the frontier Any frontier situation has many dimensions and each of the chapters highlights one or more of these from the physical and ideological aspects of Egypt's Nubian frontier to the military and cultural components of Inka outposts in Bolivia to the shifting agrarian

religious and political boundaries in Bengal They explore cases in which the centripetal forces at work in frontier zones have resulted in cultural hybridization or creolization and in some instances show how satellite settlements on the frontiers of core polities themselves develop into new core polities Each of the chapters suggests that frontiers are shaped in critical ways by topography climate vegetation and the availability of water and other strategic resources and most also consider cases of population shifts within or through a frontier zone As these studies reveal transnationalism in today s world can best be understood as an extension of frontier processes that have developed over thousands of years This book s interdisciplinary perspective challenges readers to look beyond their own fields of interest to reconsider the true nature and meaning of frontiers

The Medieval Frontiers of Latin Christendom Felipe Fernandez-Armesto,2017-05-15 The aim of this first volume in the series The Expansion of Latin Europe is to sketch the outlines of medieval expansion illustrating some of the major topics that historians have examined in the course of demonstrating the links between medieval and modern experiences The articles reprinted here show that European expansion began not in 1492 following Columbus s voyages but earlier as European Christian society re arose from the ruins of the Carolingian Empire The two phases of expansion were linked but the second period did not simply replicate the medieval experience Medieval expansion occurred as farmers merchants and missionaries reduced forests to farmland and pasture created new towns and converted the peoples encountered along the

frontiers to Christianity Later colonizers subsequently adapted the medieval experience to suit their new frontiers in the New World

**Rulers, Nomads, and Christians in Roman North Africa** Brent D. Shaw,2024-10-28 The studies collected in this volume cover three broad areas of the history of North Africa as part of the Roman Empire Studies devoted to the history of political institutions are followed by ones that detail aspects of interactions between nomad and sedentarist communities in the African provinces The book concludes with two studies on African christianity In all of these special attention is given to the indigenous institutions economies and beliefs that informed the confrontation between African and Roman The studies in general argue for a strongly interactionist approach to historians reconstruction of the history of the period and the region a perspective that would emphasise the continuous conflict between the two world of African and Roman
