Greece Rediscovered:

The Indo-Europeans Rediscovered J. P. Mallory, 2025-06-10 A lifetime's study brings revealing expertise to an oft-misunderstood topic in human history: the origin and language of the Indo-Europeans. Today, the number of native speakers of Indo-European languages across the world is approximated to be over 2.6 billion, about 45 percent of the Earth's population. Yet the idea that an ancient prehistoric population in one time and place gave rise to a wide variety of peoples and languages is one with a long and troubled past. In this expansive investigation based on more than forty years of research, archaeologist J. P. Mallory navigates the complex history of our search for the Indo-European homeland, offering fresh insight into the debates surrounding origin as well as the latest genetic research. In this compelling account, Mallory explores ancient migrations, linguistics, and archaeology, applying cutting-edge genetic research to untangle the key arguments with wit and verve. He addresses how the controversial idea of a single shared homeland has been viewed by scientists, archaeologists, and linguists across the past century and reconsiders how, in the case of the Nazis and more recent nationalist movements, they have been manipulated for political advantage. The author goes on to analyze the linguistic trail linking current populations to the Indo-Europeans, looking at Sanskrit, Greek, Latin, and more, as he traces linguistic origins across multiple peoples and cultures, bringing the most up-to-date phylogenetic research to bear on this story. Ultimately, this important volume offers the most conclusive and nuanced understanding of an oft-misrepresented and misunderstood topic.

History and National Ideology in Greek Postmodernist Fiction Gerasimos Katsan, 2013-04-04. History and National Ideology in Greek Postmodernist Fiction investigates the ways postmodernist

literary techniques have been adopted by Greek authors Taking into consideration the global impetus of postmodernism the book examines its local implications Framed by a discussion of major postmodernist thinkers the book argues for the ability of local cultures to retain their uniqueness in the face of globalization while at the same time adapting to the new global situation The combination of external global influences and the specific internal concerns of Greek national literature makes the emergence of postmodernism in Greece distinctive from that of other national contexts The book engages in larger theoretical debates about the crisis of national identity in the context of postmodern globalization and the resurgence of nationalist ideology either as a response to globalization or the exigencies of historical events This crisis has been brought on in part by the very postmodernist and poststructuralist questioning of the ideologies upon which nation states construct themselves The central argument of the book is that postmodernist Greek writers question the idea of national identity based on both the impact of globalization and a reexamination of the discourses of national ideology they suggest a turn away from the traditional concerns with cultural homogeneity towards an acceptance of multiplicity and diversity which is reflected through experimentation with postmodernist literary techniques Consequently the unifying idea of this book is national identity as it is reconfigured in recent contemporary novels My analysis incorporates the view that metafiction is a borderline or marginal discourse that exists on the boundary between fiction and criticism The book illuminates the connections between the formal concerns of contemporary authors and the larger debates and philosophical underpinnings of postmodernism in general
