Gottlieb,Gaynor Johnson,2022-04-27 This book examines the connection between notions of gender diplomacy society and peacemaking in the period c 1880 to the mid to late twentieth century The chapters in this volume place gender history at the interface with international history and international relations They explore a wide variety of themes and issues within the British and European context especially notions of gender identity the politics and culture of women s suffrage in the early part of the twentieth century and the role gender played in the formulation and execution of British foreign policy The book also breaks new ground by attempting to gender diplomacy Further it revisits the popular view that women were connected with the peace movements that grew up after the First World War because the notion of peace was associated with stereotypical female traits such as the rejection of violence and the nurturing rather than destruction of humankind The chapters in this book were originally published as a special issue of the journal *Diplomacy and Statecraft* *The British National Bibliography* Arthur James Wells,2001 [The Jewish Quarterly](#) ,1953 *Comparative Port History of Rotterdam and Antwerp (1880-2000)* Ferry de Goey,2004 Comparative port history is often preached but seldom practiced This volume

compares the development of Rotterdam and Antwerp in the period 1880-2000. Because of their geographical proximity these European ports have a long history of intense rivalry. In order to attract new cargo flows, port dues and cargo handling costs were regarded as vital instruments, but the volume qualifies the importance of pricing as a competitive instrument and questions the common typologies of Rotterdam and Antwerp. Using new methods and theories and employing an extensive recently constructed database, the book presents a fresh look at an old topic. This volume contains contributions of both Belgian and Dutch authors.

**Edinburgh History of the Book in Scotland, Volume 4: Professionalism and Diversity 1880-2000** David Finkelstein,2007-11-23 In this volume a range of distinguished contributors provide an original analysis of the book in Scotland during a period that has been until now greatly under researched and little understood The issues covered by this volume include the professionalisation of publishing its scale technological developments the role of the state including the library service the institutional structure of the book in Scotland industrial relations union activity and organisation women and the Scottish book and the economics of publishing Separate chapters cover Scottish publishing and literary culture publishing genres the art of print culture distribution and authors and readers The volume also includes an innovative use of illustrative case studies School Reform, Corporate Style Dorothy Shipps,2006 Like other big city school systems Chicago s has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipps chronicles how Chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights

dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipp's concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipp's makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership

**Exponential Inequalities** Shreya Atrey, Sandra Fredman, 2022-12-20 This thoughtfully edited volume explores the operation of equality and discrimination law in times of crisis It aims to understand how existing inequalities are exacerbated in crises and whether equality law has the tools to understand and address this contingency Experience during the COVID-19 crisis shows that the pandemic has acted as a catalyst for exponential inequalities related to racism xenophobia sexism homophobia transphobia ageism and ableism Yet the field of equality law which is meant to be addressing such discrimination or inequality has had little immediate relevance in mitigating these exponential inequalities This is despite the fact that countries like the UK have a rather recent and state-of-the-art legislation in the field namely the Equality Act 2010 Exponential Inequalities offers readers an understanding of how these inequalities came to be and how crises such as the global pandemic the climate emergency or the economic downturn can exacerbate an already untenable situation It illuminates both the structural and the conceptual as well as the practical and doctrinal difficulties currently experienced in equality law and discusses whether or not equality law even has the tools to both understand and then address this contingency Written by a team of internationally recognized experts Exponential Inequalities provides a comparative perspective on the functioning of equality laws across a range of contexts and

jurisdictions and represents an essential read for scholars and policy makers alike     Exchange Rate Regimes Past, Present
