**Meaning and Function in Collocation** Haoda Feng,2020-04-03 The issue of differences between translational language  
and native speaker language has become a topic of increasing interest in linguistics and Translation Studies TS One of the  
primary tasks in this research area is to employ a corpus approach and analyse collocations with authentic language data by  
comparing comparable corpora consisting of translated and native speaker texts Collocation in linguistics and TS refers to  
the relationship of co occurrence between lexical items The book shows that examining the use of collocations constitutes an  
integral part in assessing the naturalness of second language L2 use and therefore can be a valid measure to make a  
distinction between translational language and native speaker language Nevertheless the role of collocation has not been  
given enough attention or discussed systematically in TS and to date there are hardly any translation theorists who have  
clarified the mechanism of collocation in TS by which translators acquire receptive and productive knowledge of collocations  
in their L2 In addition previous research in this area is largely confined to Indo European languages resulting in a lack of  
empirical evidence involving Asian languages This book therefore attempts to bridge the gap in the literature and constitute  
an integral part in the research area      *InfoWorld* ,1993-06-21 InfoWorld is targeted to Senior IT professionals Content is
