## **Fragmentation And Consensus:**

*Fragmentation and Consensus* Mark G. Kuczewski, 1999-06-29 Both communitarianism and casuistry have sought to restore ethics as a practical science the former by incorporating various traditions into a shared definition of the common good the latter by considering the circumstances of each situation through critical reasoning Mark G Kuczewski analyzes the origins and methods of these two approaches and forges from them a new unified approach This approach takes the communitarian notion of the person as its starting point but also relies upon the narrative and analogical tools of case based reasoning He separates out the rhetoric that is incongruent with the Aristotelian aspirations of each method to show that the two are complementary and that consensus can emerge from fragmentation He then applies his resulting method to three major problems in bioethics the difficulties that the issue of personal identity poses for advance directives the role of the family in medical decision making and the refusal of treatment because of religious beliefs He analyzes the need to assume a communitarian notion of the person as a starting point for the application of casuistic insights Combining theoretical practical and scholarly insights this book will be of interest to philosophers political and social scientists and bioethicists
