Federalism and Labour Market Policy Queen's University (Kingston, Ont.). Institute of Intergovernmental Relations, 2004 Though these countries vary significantly in both their federal institutions and labour market policies they all seek to define a relatively coherent approach for federal and sub unit governments in a policy field where collaboration and coordination appear unavoidable In some cases such as Germany collaboration is highly developed and policies are ambitious and integrated in others such as Switzerland diversity and decentralization are privileged and policies remain fragmented Finally there are countries such as the United States that do not grant much importance to labour market policies these five

federations and so help us understand how political institutions and public policies are inter related Federalism and labour market policies certainly influence each other but there is no simple relationship between them Comparing different governance and employment strategies is nevertheless very instructive because it shows the range of approaches and policies that are possible in federal countries

The Democratic Dilemma Jennifer Smith, 2009 In 2006 Prime Minister Stephen Harper s Conservative government introduced two bills to reform the Senate one to establish limited terms for senators replacing the existing system of appointment until age 75 and the other to establish consultative elections for the Senate with the prime minister nominating the winners of the election Both bills have been heard in the House of Commons and the Senate but neither bill has been enacted into law The government s initiatives are proving controversial for two reasons One is the contents of the bills The other is procedural and concerns the federal government s strategy of treating Senate reform as a matter for Parliament alone to determine a matter of federal legislation rather than an amendment of the constitution Contributors examine all angles of the debate on Senate reform They address the constitutionality of the proposals and bring to light features of the bills that have not yet been analyzed assessing their significance for the conduct of a reformed chamber They consider whether the objectives of the reformers are likely to be met by these proposals or whether the result will have unintended consequences They demonstrate how complicated Senate reform is full of unexpected twists and turns and show that successful reform requires a deep understanding of the country s parliamentary system and culture and a delicate approach to institutional change Contributors include Jane Ajzenstat McMaster University Peter Aucoin Dalhousie University Louise Carbert Dalhousie University Don Desserud University of New Brunswick in Saint John Andrew Heard Simon Fraser University Tom Kent Institute for Research on Public Policy and Queen s University Stephen Michael MacLean independent scholar Lorna Marsden York University Vincent Pouliot lawyer and entrepreneur Quebec Hugh Segal Senate of Canada David Smith University of Regina Nadia Verrelli Queen s University Ron Watts Queen s University and John Whyte University of Saskatchewan

Transitions John Richard Allan, Thomas J. Courchene, Christian Leuprecht, 2009 Canada The State of the Federation 2006 07 deals with transitions that have been initiated by a variety of factors and have profound implications Scholars from several disciplines analyze the implications of these transitional forces bringing historical analytical fiscal and political perspectives to bear on issues arising from equalization and fiscal imbalance Contributors examine the ramifications of recent major changes to equalization and show how these changes will have far reaching and in some cases troubling implications Further transitions arise in the area of federal provincial relations as a

result of Prime Minister Harper's commitment to open federalism. In this context, contributors re-examine the role and use of federal spending power and explore whether the Canadian federation might be better served by a totally new approach to federalism. Finally, the implications of transitions affecting the role and place of cities in the Canadian federation are considered. Particular attention is given to the significance of the on-going information revolution which privileges cities most importantly global city regions as the new dynamic drivers of growth, innovation and trade.
