

DIMENSIONS of POTENTIAL FAILURE in RURAL

❖ **ECONOMIC RESTRUCTURING** - is linked to the decline mainly correlated with decreasing employment in agriculture, with serious socio-economic effects that are still visible especially in Southern and Eastern Europe; in Romania the process has been exacerbated by the decline of the extractive or manufacturing industry and the lack of substitution with alternatives

❖ **LOCATION DISADVANTAGES** - are obstacles to economic development and are frequently associated with negative location attributes (isolation, scarcity, proximity to borders, absence of natural resources or low fertility soils)

❖ **PERIFERIZATION** - is a consequence of the macro processes of reorganization of economic activity (and globalization), with the effects of not being able to take anti-cyclical and pro-active measures for development

❖ **HISTORICAL EVENTS AND TRANSITIONS** - impact the countryside through persistent gaps in economic performance, institutional legacies and inertia in adjusting governance and low self-perception of regional and local actors, with slow improvement effects on the quality of life in affected areas
