Guerrilla Wealth Jay Conrad Levinson, Loral Langemeier, 2004 **The Guerrilla Hunters** Brian D. McKnight, Barton A. Myers, 2017-04-03 Throughout the Civil War irregular warfare including the use of hit and run assaults ambushes and raiding tactics thrived in localized guerrilla fights within the Border States and the Confederate South *The Guerrilla Hunters* offers a comprehensive overview of the tactics motives and actors in these conflicts from the Confederate authorized Partisan Rangers a military force directed to spy on harass and steal from Union forces to men like John Gatewood who deserted the Confederate army in favor of targeting Tennessee civilians believed to be in sympathy with the Union With a foreword by Kenneth W Noe and an afterword by Daniel E Sutherland this collection represents an impressive array of the foremost experts on guerrilla fighting in the Civil War Providing new interpretations of this long misconstrued aspect of warfare these scholars go beyond the conventional battlefield to examine the stories of irregular combatants across all theaters of the Civil War bringing geographic breadth to what is often treated as local and regional history *The Guerrilla Hunters* shows that instances of unorthodox combat once thought isolated and infrequent were numerous and many clashes defy easy categorization Novel methodological approaches and a staggering diversity of research and topics allow this volume to support multiple areas for debate and discovery within this growing field of Civil War scholarship **Terrorism Today**

(LAMP) Jonathan S. Lockwood, 2013-09-12 The Lockwood Analytical Method for Prediction LAMP is a systematic technique for predicting short term unique behaviors Using primarily qualitative empirical data LAMP allows the analyst to predict the most likely outcomes for specific research questions across a wide range of intelligence problems such as cyber threats in the U S the possibility of an Al Qaeda attack the likelihood of Iran providing nuclear capability to terrorist groups or the future

actions of the Mexican drug cartel LAMP offers an innovative and powerful method for organizing all available information based on the perceptions of the national actors using it to make relevant predictions as to which alternate future is most likely to occur at a given moment in time Its transparent structure enables anyone to see how an analyst gets from point A to point B to produce an intelligence estimate LAMP differs from other analytical techniques in that it is based on determining the relative probability of a range of alternate futures rather than attempting to determine the quantitative probability of their occurrence After explaining its theoretical framework the text leads the reader through the process of predictive analysis before providing practical case studies showing how LAMP is applied against real world problems such as the possible responses of Israel the U S and Lebanon to the behavior of Hezbollah or the competing visions of the future of Afghanistan Evaluation of the method is provided with the case studies to show the effectiveness of the LAMP predictions over time The book is complemented by a website with downloadable software for use by students of intelligence in conducting their own predictive analysis It will be an essential tool for the analyst and the student not only for national security issues but also for competitive intelligence
