Accountability and Responsiveness at the Municipal Level Sandra Breux,Jérôme Couture,2018-07-02 In Canada the quality of municipal democracy has been questioned due to three crucial factors First voter turnout tends to be significantly lower for municipal elections than it is for other levels of government Second the re election rate of incumbent candidates is higher compared to provincial territorial and federal elections Third corruption and other scandals have tarnished the image of local democracy Are cities sufficiently capable of responding to crises and representing the interests of their residents Accountability and Responsiveness at the Municipal Level addresses these issues through qualitative and quantitative analysis focusing on some of the most important characteristics of the Canadian municipal scene including the contexts of partisanship and non partisanship the careers and daily work of municipal officials and multilevel governance This volume also assists directly in the collection and dissemination of data about cities as there is currently no centralized system for capturing and organizing electoral statistics at the municipal level Municipal democracy in Canada suffers from a representation deficit Accountability and Responsiveness at the Municipal Level is an important first step in building high quality comparative information on the politics of Canada s cities
