### Scientific Inquiry Cycle: Review

Science helps communities solve problems by developing knowledge and creating things that "solve" with a local focus such as water quality or waste management using science to assess or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various conditions, such as budget, time, and safety concerns. Community members have a role in a solution cycle. Challenges, setbacks, and the inability to weigh their individual contributions for solutions, creating resources for a task that they affect the cost and ease of use, cannot influence the effectiveness of the solution.

After identifying a solution, determining how it works, what conditions affected it, and any compromises that have already been or should involve on the way. Communication, strong critical thinking, and reflecting on the results of the solution are important steps. The process of identifying, testing, and evaluating solutions encourages responsible decision-making and helps communities thrive.

#### 6A. Mark the best answer for each question.

1. What is the first important step when working on a local problem?
- Thinking of a solution immediately
  - Using the most expensive materials
  - Ignoring safety concerns
  - Understanding the problem fully
2. What does determining conditions in a solution help with?
- Ignoring the conditions of the solution
  - Establishing a solution that is safe and viable
  - Knowing how to avoid safety concerns
  - Determining that the solution has no risks
3. Which is an example of a trade-off?
- Finding a solution with no risks
  - Using the most expensive materials
  - Using unsafe materials
  - Using a solution with no risks
4. Why is communication important in a solution cycle?
- To avoid not being in agreement
  - To make ideas clearer
  - To finish the problem as quickly as possible
  - To avoid discussing the problem

#### 6B. Mark if the statement is True (T) or False (F).

1. A solution made after one failed attempt is always better than one that is made after several failed attempts.
