

Alternative Computing Architectures As a Solution to the Application of Moore's Law Energy Consumption

Energy consumption is a major concern for data centers and cloud providers. The energy consumption of data centers is expected to reach 100 TWh by 2020, which is equivalent to the energy consumption of the entire United States in 2008.

Reducing energy consumption is a key goal for the industry. This presentation will discuss the challenges of energy consumption and the potential of alternative computing architectures to address this issue.
