Research in Technology Education Marc J. de Vries, Stefan Fletcher, Stefan Kruse, Peter Labudde, Martin Lang, Ingelore Mammes, Charle, 2018 With the increasing technology orientation in modern societies Technology Education is gaining more and more importance It should help in developing an understanding of technology as well as skills and self concepts to deal with technology However there is a lack of knowledge in how Technology Education operates and what its outcome will be Thus research work has to be done in different fields of Technology Education Upcoming academics of the CETE network have dedicated themselves to such research questions The Center of Excellence for Technology Education CETE is an international network consisting of six Universities University of Missouri University of Cambridge University of Luxembourg University of Applied Sciences and Arts Northwestern Switzerland Delft University of Technology and University of Duisburg Essen with the mission of development work One aim of CETE is to support the qualification of young academics in the research field of Technology

Education Thus the present book will attempt to resolve the lack of research in Technology Education by presenting the research work of upcoming academics In this way CETE contributes to its development work by extending the research results in Technology Education as well as by supporting young academics Beside two basic articles about Technology Education research there are different studies and their results presented Three different drafts of studies offer future prospects for research results
