**Essentials of Research Methods in Psychology with PowerWeb** Jeanne Zechmeister, Eugene Zechmeister, John Shaughnessy, 2003-04-07  
*Essentials of Research Methods in Psychology* by Jeannne S Zechmeister Eugene B Zechmeister and John J Shaughnessy is designed to teach students the process of research: developing research ideas, forming a hypothesis, choosing a design, selecting the appropriate method, collecting, interpreting, and reporting the results. A guide for the research process is introduced in the second chapter and reinforced as each method is introduced. The use of a consistent framework allows students to see the commonality of each method, making the subsequent methods easier to learn. *Essentials* is based on the successful *Research Methods in Psychology* 5th edition text by the same authors. This text was completely rewritten in a more conversational style, including the use of cartoons and insights from researchers describing how they conducted studies, to appeal to students with little mathematical background. Case studies are used to show the use of appropriate methods and the ethical considerations inherent in the research process. This 250-page paperback text is ideal for a community college or for a four-year university where brief coverage is desired.

Powerweb Mary Renck Jalongo, Diana Kyle, 2002-10  
Written for a research methods course that follows a preliminary statistics course, Author David Pittenger's insight that students who studied statistics first had not mastered that subject led to writing a methods text that reviews and integrates statistical discussions with that of research design. Employing an informal style with interesting everyday examples, Pittenger emphasizes that good

psychological research allows us to answer many practical questions related to improving the quality of life.
