Strategies for Teaching Strings Donald L. Hamann, Robert Gillespie, 2009 This book is an essential guide for prospective novice and experienced string teachers alike Now featuring an integrated DVD this text provides all the information necessary to develop and manage a successful school based program Based on a national standards for teaching strings and orchestra the text covers performance objectives strategies for teaching technical and performance skills and solutions to common playing problems for elementary middle and high school skill levels It also offers rehearsal strategies to develop large group ensemble techniques practical approaches to teaching improvisation and advice on how to increase student recruitment and retention Book Jacket Music, Sound, and Technology John Eargle, 1990-08-09 This book is about music the instruments and players who produce it and the technologies that support it Although much modern music is

produced by electronic means its underlying basis is still traditional acoustical sound production and that broad topic provides the basis for this book There are many fine books available that treat musical acoustics largely from the physical point of view The approach taken here is to present only the fundamentals of musical physics while giving special emphasis to the relation between instrument and player and stressing the characteristics of instruments that are of special concern to engineers and technicians involved in the fields of recording sound reinforcement and broadcasting In order to understand musical instruments in their normal performance environments the student must have a basic working knowledge of physical and architectural acoustics The book begins with a review of the elements of acoustics stressing the nature of sound fields and phenomena that are wavelength dependent The book then moves on to a discussion of those aspects of psychological acoustics that are of special concern to music technicians most notably concepts of stereophonic imaging loudness related phenomena and critical band theory
