Engineering Volume 2 E. Kendall Pye, 1974-10-01 Considerable worldwide interest has arisen in recent years in the controlled use of enzymes as catalysts in industrial processing analytical chemistry and medical therapy This interest has generated the new interdisciplinary field of Enzyme Engineering which includes both the scientific and technologic aspects of the production purification immobilization and application of enzymes in a variety of situations and reactor configurations A series of Engineering Foundation conferences on Enzyme Engineering was initiated to provide an international forum for the exchange of ideas and information over the entire range of this new field The outstanding success of the first two conferences attests to the vigor and potential of this field to contribute significantly to a better understanding and resolution of some of the major problems faced by mankind The first conference which was held August 9-13 1971 at Henniker New Hampshire U S A aided significantly in molding the several traditional disciplines that interact to form the field of Enzyme Engineering The conference was highly successful mainly because many of the key scientists and engineers from the several facets of Enzyme Engineering were brought together for the first time at a single residential meeting The result was an exchange of ideas and education of one another in the pertinent principles of the diverse disciplines which contribute to this field The second conference held August 5-10 1973 at Henniker New Hampshire U S A
