# Equal Vs Unequal

**Victor M. Corman**

## Equal Vs Unequal:

### **The long and short of mental time travel-- self-projection over time-scales large and small** James M.

Broadway, Claire M. Zedelius, Jonathan W. Schooler, Simon Grondin, 2015-07-02 Researchers working in many fields of psychology and neuroscience are interested in the temporal structure of experience as well as the experience of time at scales of a few milliseconds up to a few seconds as well as days months years and beyond This Research Topic supposes that broadly speaking the field of time psychology can be organized by distinguishing between perceptual and conceptual time scales Dealing with conceptual time mental time travel also called mental simulation self projection episodic semantic memory propection foresight allows humans and perhaps other animals to imagine and plan events and experiences in their personal futures based in large part on memories of their personal pasts as well as general knowledge Moreover contents of human language and thought are fundamentally organized by a temporal dimension enmeshed with it so thoroughly that it is usually expressible only through spatial metaphors But what might such notions have to do with experienced durations of events lasting milliseconds up to a few seconds during the so called present moment of perception action cycle time This Research Topic is organized around the general premise that by considering how mental time travel might scale down to time perception and vice versa no less progress and integrative synthesis within and across scientific domains might be facilitated Bipolar configurations of future and past orientations of the self may be repeated in parallel across conceptual and perceptual time scales subsumed by a general Janus like feedforward feedback system for goal pursuit As an example it is notable that the duality of propection and semantic episodic memory operating at conceptual time scales has an analogue in perception action cycle time namely the interplay of anticipatory attention and working memory Authors from all areas of psychology and neuroscience are encouraged to submit articles of any format accepted by the journal Original Research Methods Hypothesis Theory Reviews etc which might speak to questions about time and temporal phenomena at long and or short time scales

*Measurement Theory and Applications for the Social Sciences* Deborah L. Bandalos, 2017-12-12 Which types of validity evidence should be considered when determining whether a scale is appropriate for a given measurement situation What about reliability evidence Using clear explanations illustrated by examples from across the social and behavioral sciences this engaging text prepares students to make effective decisions about the selection administration scoring interpretation and development of measurement instruments Coverage includes the essential measurement topics of scale development item writing and analysis and reliability and validity as well as more advanced topics such as exploratory and confirmatory factor analysis item response theory diagnostic classification models test bias and fairness standard setting and equating End of chapter exercises with answers emphasize both computations and conceptual understanding to encourage readers to think critically about the material The companion website [www.guilford.com/bandalos](http://www.guilford.com/bandalos) materials provides annotated examples syntax and datasets in both SPSS and SAS for most chapters so that readers can redo the

analyses in each chapter

**Simplicius: On Aristotle Categories 5-6** Barrie Fleet, Frans de Haas, 2014-04-10 Chapters 5 and 6 of Aristotle's Categories describe his first two categories Substance and Quantity It is usually taken that Plotinus attacked Aristotle's Categories but that Porphyry and Iamblichus restored it to the curriculum once and for all Nonetheless the introduction to this text stresses how much of the defence of Aristotle Porphyry was able to draw out of Plotinus critical discussion Simplicius commentary is our most comprehensive account of the debate on the validity of Aristotle's Categories One subject discussed by Simplicius in these chapters is where the differentia of a species eg the rationality of humans fits into the scheme of categories Another is why Aristotle elevates the category of Quantity to second place above the category of Quality Further de Haas shows how Simplicius distinguishes different kinds of universal order to solve some of the problems

**An Introduction to Statistical Concepts** Richard G Lomax, Debbie L. Hahs-Vaughn, 2013-06-19 This comprehensive flexible text is used in both one and two semester courses to review introductory through intermediate statistics Instructors select the topics that are most appropriate for their course Its conceptual approach helps students more easily understand the concepts and interpret SPSS and research results Key concepts are simply stated and occasionally reintroduced and related to one another for reinforcement Numerous examples demonstrate their relevance This edition features more explanation to increase understanding of the concepts Only crucial equations are included In addition to updating throughout the new edition features New co author Debbie L Hahs Vaughn the 2007 recipient of the University of Central Florida's College of Education Excellence in Graduate Teaching Award A new chapter on logistic regression models for today's more complex methodologies More on computing confidence intervals and conducting power analyses using G Power Many more SPSS screenshots to assist with understanding how to navigate SPSS and annotated SPSS output to assist in the interpretation of results Extended sections on how to write up statistical results in APA format New learning tools including chapter opening vignettes outlines and a list of key concepts many more examples tables and figures boxes and chapter summaries More tables of assumptions and the effects of their violation including how to test them in SPSS 33% new conceptual computational and all new interpretative problems A website that features PowerPoint slides answers to the even numbered problems and test items for instructors and for students the chapter outlines key concepts and datasets that can be used in SPSS and other packages and more Each chapter begins with an outline a list of key concepts and a vignette related to those concepts Realistic examples from education and the behavioral sciences illustrate those concepts Each example examines the procedures and assumptions and provides instructions for how to run SPSS including annotated output and tips to develop an APA style write up Useful tables of assumptions and the effects of their violation are included along with how to test assumptions in SPSS Stop and Think boxes provide helpful tips for better understanding the concepts Each chapter includes computational conceptual and interpretive problems The data sets used in the examples and problems are provided on the web Answers to the odd numbered problems are given in the book The first five chapters review

descriptive statistics including ways of representing data graphically statistical measures the normal distribution and probability and sampling The remainder of the text covers inferential statistics involving means proportions variances and correlations basic and advanced analysis of variance and regression models Topics not dealt with in other texts such as robust methods multiple comparison and nonparametric procedures and advanced ANOVA and multiple and logistic regression models are also reviewed Intended for one or two semester courses in statistics taught in education and or the behavioral sciences at the graduate and or advanced undergraduate level knowledge of statistics is not a prerequisite A rudimentary knowledge of algebra is required
