

The Geologic Evolution Of North America

• **Figure 8.6 The Geologic Evolution of North America** North America evolved to its present size and shape by the amalgamation of Archean cratons that served as nuclei around which younger continental crust was added. We can think of North America, and the other continents, as a mosaic that was pieced together from the Archean to the present. The sequence of Precambrian events in North America's history are discussed in more detail in Chapter 9.
