dramatically expanded in recent years. Because of decreasing prices, superior hardware is now being used and image quality is better than ever. Many people now require image synthesis techniques and software for their applications. Moreover, the techniques of computer animation have become very popular. In this book, we present a wide range of applications of computer graphics. This book is a collection of 44 papers in various areas of computer graphics selected from papers presented at Graphics Interface 85. Graphics Interface 85, held from May 27 to 31 in Montreal, was the first truly international computer graphics conference in Canada. This year, for the first time, the conference was presented jointly by the Computer Graphics Society and the Canadian Man-Computer Communications Society. This new arrangement gave the conference international scope. The conference was sponsored by the Department of Communications in Ottawa, the Department of Science and Technology in Quebec, Supply and Services Canada, the Natural Sciences and Engineering Research Council of Canada, Hydro-Quebec, the Association Canadienne Française pour l'Avancement des Sciences, and the Canadian Broadcasting Corporation. Graphics Interface 85 was organized by École des Hautes Études Commerciales of the University of Montreal. Over 100 papers were submitted to the conference, but 64 were selected by the international program committee for presentation. This book contains new, expanded versions of the papers:
