

Duality and Finite State Interactions

- Returning to $\pi^- \pi^- \pi^+$ final state we see that final state interactions are perhaps already included in quasi two body model and so should NOT be added

This final state interaction “generates” the Reggeons in the t_{23} channel and we include these in $\rho + \epsilon$ ansatz in s_{13} channel

- Not totally clear as Pomeron component in t_{23} channel is not included in duality (it corresponds to “background in s_{13} which we try not to include)
- Unitarity (final state interactions) rigorously give a discontinuity across a t_{23} cut but not so clear this is very useful
