Habits Of Mind Fostering Access And Excellence In Hi:

Habits of Mind William Allen, 2017-09-20 Habits of Mind maintains that the fact that almost everyone now goes to college need not be seen as an obstacle to excellence in education Some critics have insisted that college is not for everyone but William B Allen and Carol Allen assert that the college diploma has rightly become as much the norm in this century as the high school diploma was during the twentieth century Accordingly it is essential that higher education remains true to its deepest purpose the cultivation of proficient humanity The authors see the key to this goal as the development of judgment or habits of mind Habits of mind are far and away the most influential determinants of human conduct and nowhere are they more profoundly shaped than in institutions of higher education Furthermore liberal education has proven most effective in this undertaking The authors elaborate on the purpose of higher education and identify the chief obstacles to achieving its aim They demonstrate the critical role of academic leaders in achieving the aim of higher education and posit that excellence in judgment is the primary characteristic of the academic leaders who fulfill this role They examine three aspects of access to higher education academic readiness the cost and funding of higher education and the capacity of the physical plant Finally they use policies developed in Virginia to demonstrate realistic approaches to achieving the aims of access and quality discussed throughout the book The authors draw on their years of experience as practitioners in both private and public institutions liberal arts colleges and research universities to develop their material This volume will be of interest to faculty and students in higher education programs nation and state public policymakers legislative and academic leaders and a general public concerned about the cost and value of a college education

Habits of Mind William Barclay Allen, Carol M. Allen, 2003 a compelling synthesis that clears away much of the intellectual clutter in strategic planning and offers a creative if somewhat elitist theory that fuses the strengths of the university with the context and challenges of the 21st century

Choice Habits of Mind maintains that the fact that almost everyone now goes to college need not be seen as an obstacle to excellence in education Some critics have insisted that college is not for everyone but William B Allen and Carol Allen assert that the college diploma has rightly become as much the norm in this century as the high school diploma was during the twentieth century Accordingly it is essential that higher education remains true to its deepest purpose the cultivation of proficient humanity The authors see the key to this goal as the development of judgment or habits of mind Habits of mind are far and away the most influential determinants of human conduct and nowhere are they more profoundly shaped than in institutions of higher education Furthermore liberal education has proven most effective in this undertaking The authors elaborate on the purpose of higher education and identify the chief obstacles to achieving its aim They demonstrate the critical role of academic leaders in achieving the aim of higher education and posit that excellence in judgment is the primary characteristic of the academic leaders who fulfill this role They examine three aspects of access to higher education academic readiness the cost and funding of higher education and the capacity of the physical plant Finally they use policies

developed in Virginia to demonstrate realistic approaches to achieving the aims of access and quality discussed throughout the book. The authors draw on their years of experience as practitioners in both private and public institutions: liberal arts colleges and research universities to develop their material. This volume will be of interest to faculty and students in higher education programs, national and state public policymakers, legislative and academic leaders, and a general public concerned about the cost and value of a college education. William B. Allen is professor of political science and director of the program in public policy and administration at Michigan State University. He is author of *The Federalist Papers: A Commentary* and *Let the Advice be Good: A Defense of Madison's Democratic Nationalism*. Carol M. Allen is a research specialist in the Department of Political Science, Michigan State University, and a free lance editor. She has published articles on literacy, cooperative collection development, and library systems implementation. The goal of higher education as described by Allen and Allen is based on a curriculum of study for a proficient humanity characterized by excellence in judgement. The authors have presented a refreshing treatise on the values of education: respect for working toward a more civilized society, acknowledgement of human dignity, and the need for more moral and fair treatment within our society. Higher education is positioned to contribute to these lofty ideals and is described very well in this book. Alton L. Taylor, University of Virginia.

The Idea of the American University Bradley C.S. Watson, 2010-12-28. As John Henry Newman reflected on *The Idea of a University* more than a century and a half ago, Bradley C. S. Watson brings together some of the nation's most eminent thinkers on higher education to reflect on the nature and purposes of the American university today. They detail the life and rather sad times of the American university, its relationship to democracy, and the place of the liberal arts within it. Their mordant reflections paint a picture of the American university in crisis. But they also point toward a renewal of the university by redirecting it toward those things that resist the passions of the moment or the pull of mere utility. This book is essential reading for thoughtful citizens, scholars, and educational policymakers.

Decline and Revival in Higher Education Herbert I. London, 2011-12-31. This is an analysis of higher education in the past half century, a period of dramatic change and democratization. But it is more than that. The author has been a participant in the struggle to stem the decline in higher education as it moved from an emphasis on classical liberal values toward relativism and ideological extremism. This volume reflects an awareness of what has been lost but sees hope for a revival of traditional values as technological change and awareness of failure forces institutions to examine their premise. Herbert I. London has provided here fuel for fundamental redirection in American college and university affairs. *Decline and Revival in Higher Education* is uncompromising in its concerns but points the way toward a future linked to the best of the past. The work follows the personal evolution of the author while at the same time describes the devolution of university standards in such institutions as Columbia, Duke, the University of California at Berkeley, and New York University. While seeing optimistic trends in oases of traditional programming that can serve as a counterweight to campus orthodoxies, London argues that the dramatic transformation of

the academy cannot be denied The social sciences and humanities in particular have become isolated from mainstream requirements in the nation London deals with concrete concerns such as the collapse of classic book programs in the contemporary curriculum the decline and even vigilante raids on opposition in campus publications the collapse of moral judgment in favor of pure relativism the transformation of many museums into a storage houses of debris and the confusion of coarse language with democratization These developments lead the author to write this book for if the culture wars are over the American people may be the losers

Ending Racial Preferences Carol M. Allen,2008-01-01 Ending Racial Preferences The Michigan Story provides an in depth account of the 2006 Michigan Civil Rights Initiative told from the perspective of Toward A Fair Michigan a non partisan educational organization The book also analyzes the campaigning and impact of similar initiatives in California Florida Washington and the city of Houston

Falk,Jacqueline Ancess,2017-10-05 This book examines through case studies of elementary and secondary schools how five schools have developed authentic performance based assessments of students learning and how this work has interacted with and influenced the teaching and learning experiences students encounter in school This important and timely book reveals the changing dynamics of classroom life as it moves from more traditional pedagogy to one that asks students to master intellectual and practical skills that are eminently transferable to real life social settings and workplaces The issue of assessment comes first but we see in the following case studies how it becomes powerfully enveloped in the processes of learning and teaching of informing students teachers parents and others of how the children are doing The portraits explicitly and implicitly suggest a deep fair and defensible way to answer the question How m I doing in a manner that helps this child and eventually every child From the Foreword by Theodore R Sizer Informative and thought provoking American Journal of Education
