# Ethical Intersections

**Chad R. Lochmiller, Jessica N. Lester**

## **Ethical Intersections:**

**Ethical Intersections** Jeanne Daly, 2019-03-13 This book presents a collection of essays that aims to make public the social discourse on ethics of health research used by responsible practising researchers in order to demonstrate the detailed and fine consideration given to the ethics of the research task *International Handbook of Applied Research in Intellectual Disabilities* Eric Emerson, Chris Hatton, Travis Thompson, Trevor Parmenter, 2004-08-13 The landmark *International Handbook of Applied Research in Intellectual Disabilities* presents, explains and illustrates key methods of research and evaluation of proven relevance and value to the field of intellectual disabilities. It features sections on the concepts and theoretical models underlying research and evaluation, the methods and techniques themselves, and the key application areas where the methods are demonstrated in action. Coverage includes applications in educational, social, family, health and employment aspects of care and provision for those with intellectual disabilities.

**Ethics in the Anthropology of Business** Timothy de Waal Malefyt, Robert J Morais, 2017-05-02 Ethics in business is a major topic both in the social sciences and in business itself. Anthropologists long attendant to the intersection of ethics and practice are particularly well suited to offer vital insights on the subject. This timely collection considers a range of ethical issues in business through the examination of anthropologically informed theory and case examples. The meaning of ethical values, practices and education are explored, as well as practical ways of implementing them, while the specific ethical challenges of industries such as advertising, market research and design are considered. Contributions from anthropologists in business and academia promise a broad range of perspectives and add to the growing discussion on the ways anthropologists study, work, teach and engage in a variety of industry settings. Engagingly written, *Ethics in the Anthropology of Business* will be of interest to a wide variety of audiences including practicing anthropologists, current and future business leaders and scholars, and students from a range of social sciences.

**Ethics and Christian Musicking** Nathan Myrick, Mark Porter, 2021-03-22 The relationship between musical activity and ethical significance occupies long traditions of thought and reflection both within Christianity and beyond. From concerns regarding music and the passions in early Christian writings through to moral panics regarding rock music in the 20th century, Christians have often gravitated to the view that music can become morally weighted, building a range of normative practices and prescriptions upon particular modes of ethical judgment. But how should we think about ethics and Christian musical activity in the contemporary world? As studies of Christian musicking have moved to incorporate the experiences, agencies and relationships of congregations, ethical questions have become implicit in new ways. In a range of recent research, how do communities negotiate questions of value in music? How are processes of encounter with a variety of different others negotiated through musical activity? What responsibilities arise within musical communities? This volume seeks to expand this conversation. Divided into four sections, the book covers the relationship of Christian musicking to the body, responsibilities and values, identity and encounter, and notions of the self. The result is a wide-ranging perspective on music as an ethical

practice particularly as it relates to contemporary religious and spiritual communities This collection is an important milestone at the intersection of ethnomusicology musicology religious studies and theology It will be a vital reference for scholars and practitioners reflecting on the values and practices of worshipping communities in the contemporary world

An Introduction to Educational Research Chad R. Lochmiller, Jessica N. Lester, 2015-12-11 Written specifically for education practitioners An Introduction to Educational Research Connecting Methods to Practice approaches research methods from a practice first perspective that aligns research with professional experiences and identifies the tools and resources readers can use when conducting their own research Throughout the book authors Chad R Lochmiller and Jessica N Lester illuminate complex research concepts using problems of practice confronting educators to help readers make meaningful connections with key concepts and research practices The authors present balanced coverage across research methodologies that is linked to practice so readers clearly see research as a tool they can use to improve classrooms schools districts and educational organizations

**Intersections** James M. Gustafson, 1996 In his 1994 A Sense of the Divine The Natural Environment from a Theocentric Perspective James M Gustafson offered a long awaited application of his theocentric ethics In Intersections Gustafson continues to insist that theology and theological ethics must overlap with other diverse fields of study particularly the hard sciences if they are to remain rich vital and relevant in the years ahead With trademark clarity he relentlessly pursues the fundamental questions of theological ethics the nature of being human what distinguishes us from other species how our self interest conflicts with our sympathy and concern for others and the role of religious faith After contrasting two interpretations of human nature one from theologian Reinhold Niebuhr the other from biologist Melvin Konner Gustafson suggests four modes of moral discourse about medicine then examines styles of religious reflection in medical ethics Briefly sharpening his focus on genetic therapy he moves to larger questions of human viability concluding with a stirring call to scholars clergy and laypersons alike to engage in these intellectual intersections intersections that have above all supreme practical importance in our daily lives

**Ethical Intersections** Daly, 1996-06 Researchers clinicians and consumers differ in their view of what is to count as ethical research because of different backgrounds different needs and different experiences When they meet and conflict in universities and hospitals this constitutes the ethical consideration which faces health researchers in the world today

**Research Ethics for Social Scientists** Mark Israel, Iain Hay, 2006-06-29 This is an excellent book which can be recommended both to the professional ethicist seeking to situate research ethics for a social scientific audience and to social scientists seeking an overview of the current ethical landscape of their discipline Research Ethics Review Ethics is becoming an increasingly prominent issue for all researchers across the western world This comprehensive and accessible guide introduces students to the field and encourages knowledge of research ethics in practice Research Ethics for Social Scientists sets out to do four things The first is to demonstrate the practical value of thinking seriously and systematically about what constitutes ethical conduct in social science research

Secondly the text identifies how and why current regulatory regimes have emerged Thirdly it seeks to reveal those practices that have contributed to the adversarial relationships between researchers and regulators Finally the book hopes to encourage both parties to develop shared solutions to ethical and regulatory problems Research Ethics for Social Scientists is an excellent introductory text for students as it introduces students to ethical theory and philosophy provides practical guidance on what ethical theory means for research practice provides case studies to give real examples of ethics in research action The result is an informative accessible and practical guide to research ethics for any student or researcher in the social sciences

*Ethics of Art Sales* Logan Rodriguez, AI, 2025-02-22 *Ethics of Art Sales* explores the ethical complexities within the art market an environment often perceived as both a creative haven and a business rife with compromise The book delves into opaque pricing mechanisms and the potential exploitation of artists crucial issues that impact not only those directly involved but also broader cultural perceptions For instance the valuation of art can be highly speculative influenced by factors beyond artistic merit and the book also confronts issues like cultural appropriation and provenance This examination begins by introducing key players and economic forces progressing to challenges faced by artists concerning fair compensation and culminates in ethical considerations for collectors and institutions The art market s historical context is considered acknowledging its evolution By advocating for transparency and a reevaluation of values the book argues for a more equitable and sustainable art ecosystem The book s unique value lies in its blend of academic research and insights from art market professionals providing a framework for ethical decision making in a largely unregulated environment It highlights the need for heightened awareness among artists collectors dealers and museum professionals offering practical guidance for responsible art acquisition and stewardship

*Feminist Ethics* Claudia Card, 1991 Fifteen essays address subjects ranging from the history of feminist ethics to the logic of pluralist feminism and present feminist perspectives on such topics as terrorism bitterness women trusting other women and survival and ethics Paper edition unseen 14 95 Annotation copyrighted by Book News Inc Portland OR

*Virtue and Liberation in the Ethics of Bonhoeffer* Kristopher Norris, 2026-02-19 Provides analyses of contemporary ethical issues that emerge out of the use of liberation and postliberal theologies

*Doing Ethics in Journalism* Jay Black, Bob Steele, Ralph D. Barney, 1999

**Encyclopaedia of Religion and Ethics** James Hastings, John Alexander Selbie, Louis Herbert Gray, 1908

**The Ethical System of James Martineau** Joseph Herman Hertz, 1894

*Ethical Approaches to Animal-based Science* Gill P. Sutherland, 1998

*Ethics at the Edges of Life* Paul Ramsey, Robert Paul Ramsey, 1978-01-01 The tremendous changes in society s attitudes toward abortion euthanasia the right to die and other related life and death issues are reflected in recent court decisions and in new legislation This important book by one of America s leading writers in the field of medical ethics analyzes these legal issues at the ethical level showing how our laws and practices affect and reflect the morality of our times Ramsey is concerned with medicine ethics law and with medical and public policy He examines relevant laws and court decisions that make policy but

not without a healthy measure of moral argument and critical assessment Among the recent legal issues that he analyzes in detail are the decision of the Supreme Court of New Jersey in the Quinlan case the rights of defective newborn infants the Edelin negligent manslaughter case the conscience clauses in our federal code and in state statutes the Supreme Court's landmark decision on abortion in Planned Parenthood v Danforth and California's Natural Death Act Ramsey studies the reasoning behind the court's decision or the law and holds up these legal processes as mirrors in which we can see reflected the state of moral questions as they are perceived by contemporary society A perceptive and well informed social critic he provides an ethical assessment of the discourse going on concerning issues of medical practice and public policy What Ramsey has to say must be of compelling interest to everyone concerned with the moral problems of medicine life and death and not merely to those who share his faith This is probably the single most important text in the area of medical ethics written in modern times It is a book that cannot itself be summarized it has to be read Alasdair MacIntyre The New Republic Ramsey's arguments reflect great moral passion as well as his usual rigorous analysis James F Childress Religious Studies Review Ramsey forces one to think deeply and systematically about issues that cannot be reduced to maxims or formulas His work serves both as a challenge and as an inspiration New England Journal of Medicine A monumental feat Ramsey is neither a physician nor a lawyer but I venture to say that he has much to offer members of each profession and a great deal to offer the average reader His analysis of the legal issues at the edges of life and his critical assessment of the relevant court decisions are brimful probing and provocative A meaty book beautifully written Yale Kamisar Ethics at the Edges of Life was selected as an outstanding book for 1979 in the Scholarly Books category of the National Religious Book Awards *Ethics* Arthur Lynch, 1922 **Ethics** **International Congress of Arts and Science: Ethics, aesthetics and mathematics**, 1908 **Principles of Biomedical Ethics** Tom L. Beauchamp, James F. Childress, 1983 Encyclopædia of Religion and Ethics: Mundas-Phrygians James Hastings, John Alexander Selbie, Louis Herbert Gray, 1917 Scope theology philosophy ethics of various religions and ethical systems and relevant portions of anthropology mythology folklore biology psychology economics and sociology
