Commercial

Relates to trade and sales activities.

Entrepreneurial Function

Fred Manville Taylor

Entrepreneurial Function:

The Entrepreneurial Function LaRue Tone Hosmer, Arnold C. Cooper, Karl H. Vesper, 1977

Entrepreneurs and the Entrepreneurial Function Israel M. Kirzner, 2009 Investigates why economic theory has avoided the topic of entrepreneurship and proposes a framework for classifying analytic approaches to entrepreneurship The absence of the entrepreneur in modern economic theory is explained by the fact that the marketplace agitation brought about by entrepreneurial activity is precisely the element from which it is necessary for economic analysis to abstract Walrasian equilibrium analysis is compared to the work of Schumpeter to illustrate the possibility of an analytical approach that includes entrepreneurship Four levels of entrepreneurship analysis are identified the entrepreneur as a profit maximizing decision maker with full relevant information the entrepreneur as one who possesses certain personal characteristics such as boldness or acumen a market consequences approach that superimposes entrepreneurial activity on an equilibrium market model and a market consequences approach that does not presume a background equilibrium market model The first and second levels are rejected as being viable avenues for theoretical economic explanation and the author suggests that economists should pursue the implications within market processes of entrepreneurial activity which entails developing theory at the third and fourth levels

CAR *Sustaining Entrepreneurship and Economic Growth* Max Keilbach, Jagannadha Pawan Tamvada, David B. Audretsch, 2008-11-13 Academic research on developed countries has scientifically evaluated the role of entrepreneurship on economic growth market expansion commercializing innovation and reducing unemployment In this research regions or industries with higher rates of entrepreneurship show higher levels of innovation and economic growth The literature on entrepreneurship and innovation has largely ignored developing countries despite the positive results from new venture investments in India China and elsewhere This volume bridges this gap by bringing together research by scholars in Germany and India whose analysis of entrepreneurship innovation and economic development in their respective countries reveals commonalities Covering such timely issues as R D and labor policies and including case examples from the chemical biotech and IT industries the authors offer insight into the entrepreneurial process The volume concludes with a discussion of the global implications for entrepreneurship research and policy

Solutions for Business, Culture and Religion in Eastern Europe and Beyond Sebastian Văduva, Ioan Ș. Fotea, Andrew R. Thomas, 2017-10-26 This book explores the increased necessity of organizations to encourage human talent in the globalized economy with particular emphasis on the impact in Eastern Europe Featuring contributions presented at the 7th Annual Griffiths School of Management International Conference on Business and Ethics GSMAC organized by Emanuel University of Oradea this book presents in depth analysis of the economic social and religious implications of the transition from low cost of labor to increased human talent in Eastern Europe and offers multiple theoretical and practical solutions In 2004 Klaus Schwab president and founder of the World Economic Forum stated that the old era of capitalism and socialism is being replaced by a

new era of talentism The true competitive advantage of organizations and nations is increasingly becoming human talent defined as the ability to have new ideas that have value Nations and organizations are exploring ways to reform their education systems and organizational structures in order to train foster and encourage human talent In Eastern Europe since the fall of communism in 1989 the competitive advantage of the region has been low cost of labor However since the integration within the European Union millions of Eastern Europeans have left their home countries rendering the low wage competitive advantage almost obsolete In addition the migration of able working individuals has left behind mainly children and pensioners placing a disproportionately heavy burden upon public and government services It is within this context that the contents of this book explore the impact of the increased need of high human talent on Eastern European countries Featuring contributions around topics such as poverty healthcare management cross border cooperation education systems and religious influence on economic development this book will be of interest of scholars researchers students and policy makers interested in the business development and economic growth of Eastern Europe

De Gruyter Handbook of SME Entrepreneurship Marina Dabić, Sascha Kraus, 2023-11-06 A small business is not a little big business Small and medium sized enterprises SMEs are considered the engines of worldwide economies and the main sources of job creation Management in these companies is different from management in larger older enterprises with their already established concepts and instruments In view of the high importance of SMEs in emerging developing and developed economies worldwide the De Gruyter Handbook of SME Entrepreneurship investigates the underlying mechanisms and practices of management within these companies with a focus on entrepreneurship growth and innovation It argues that it is time for a dedicated theory of SME Entrepreneurship to emerge Entrepreneurial thinking and behavior in SMEs must be differentiated from that of start ups and large companies On the other hand it also explores the different entrepreneurship manifestations that exist within a widely heterogeneous group of SMEs The handbook provides a theoretical framework in which to understand compare and contrast the complexity of SMEs in both domestic and international processes and addresses the strengths achievements and challenges of entrepreneurship in SMEs

Efficiency and Optimization in Business Practice Cristina Blanco González-Tejero, Silvia Giralt Escobar, Alicia Ramírez Orellana, Domingo Enrique Ribeiro-Soriano, 2025-09-05 This book aims to provide a comprehensive overview of the concept of efficiency in the business world offering key tools and strategies for development and sustainability in a dynamic environment Adaptation is essential in the digital age where organizations are challenged to examine the costs associated with their production processes and adopt automation and innovation processes to enhance efficiency and remain competitive Throughout the chapters the keys will be identified for companies to recognize the need to balance economic growth with adaptation to the changing environment The first part of the book presents a more theoretical vision of current variables that have the potential to impact organizational strategy while the second part offers a more technical contribution focusing on specific processes and

strategies Thus the dual nature of this book allows it to reach a specific readership providing essential theoretical and practical knowledge for efficient organizational management The potential audience for this book includes executives and managers from companies in various industry sectors such as manufacturing technology financial services accounting and consulting

Entrepreneurial Function and Its Rewards Atsushi Oyama,2008 There is a consensus among economists that a formal analysis of entrepreneurship has not yet been adequately incorporated into economics In this dissertation study we take a small step towards developing new insights and analytical tools that would contribute to this goal In the first essay we pose the question of what entrepreneurs do to create economic value by focusing on occupations where entrepreneurial activities involve learning adopting and implementing advanced technical knowledge We construct a model where entrepreneurs possessing sufficiently high skills in and knowledge about advanced technology earn a positive premium while those who locate far away from their set of skills in the technology space earn negative returns The second essay examines the roles of comparative advantage learning and human capital in workers mobility between entrepreneurial and non entrepreneurial sectors as well as the implications of these for the evolution of the entrepreneurship premium over a life cycle The model demonstrates that highly talented young individuals are drawn into entrepreneurship when intensive use of specialized technical knowledge is required to perform their jobs The implications of each model in the two essays are empirically examined by using the NSF database of Science and Engineering Statistical Data System SESTAT Past empirical studies of entrepreneurship have documented i negative pecuniary returns to entrepreneurship and ii the sorting pattern according to which less talented individuals become entrepreneurs In most of these studies the heterogeneity of self employed with respect to their human capital and skills has not been considered to any meaningful degree In the theory of this dissertation study returns to entrepreneurship and the pattern of sorting depend crucially on whether entrepreneurs human capital is high enough or not to employ advanced technical knowledge in their jobs The empirical part of this dissertation study uses SESTAT to actually distinguish between these two types of entrepreneurs in the data Empirical results based on this strategy reveal that highly talented individuals are drawn into the self employment sector and earn positive pecuniary returns only if they intensively use advanced technical knowledge

Principles of Economics Frederic B. Garver,Alvin Harvey Hansen,1928 The American Economic Review ,1917 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association **Johns Hopkins University Studies in Historical and Political Science** ,1922 Entrepreneurship, Technological Innovation, and Economic Growth Frederic M. Scherer,Mark Perlman,1992 Papers presented at the third biennial meeting of the International J A Schumpeter Society **Economics for the Accountant** Kemper Simpson,1921 **The Quarterly Journal of Economics** Charles Franklin Dunbar, Frank William Taussig, Abbott Payson Usher, Alvin Harvey Hansen, William Leonard Crum, Edward Chamberlin, Arthur Eli Monroe, 1920 Issues for 1886 1908 include the section

Recent publications upon economics **The Hindustan Review** ,1909 Industrial Society Leon Carroll Marshall,1929
