Environmental Ethics,2001

Environmental Politics and Policy Brent Steel,Richard L. Clinton,Nicholas P. Lovrich,2003 This exciting new text for the Environmental Politics and or Policy course s does not just look at this subject from a U S perspective but an international one expanding upon and reflecting the globalization of this important area of study Using the comparative approach students will learn about environmental issues but not without a larger context Included in the comparative examination are post industrial countries developing countries post Communist countries and of course the U S In addition chapters on science what science is and how it fits into the political context international law and emerging issues such as women and the environment make this a strong and exciting text

When Smoke Ran Like Water Devra Lee Davis,2002 This text shows that we have the scientific tools to reveal the connection between environment and disease in a way never before possible and even to predict which chemicals pose the greatest risk We no longer need to wait for actual human harm as the only proof of harmfulness Davis describes how the science of environmental epidemiology arose and how

environmental toxins affect a broad spectrum of human health including breast cancer the health and development of the lungs and even male reproductive capacity The book shows readers the full picture of how the environment is affecting their health what they can do about it and why standard approaches to public health need to change **Blood Pressure**

Changes in Deception Matthew Napoleon Chappell,1929 **Ideology, Social Theory, and the Environment** William D. Sunderlin,2003 This book shows that polemical environmental and ecological debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems

Seeing Nature Through Gender Virginia Scharff,2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women s actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet The Best Books for Academic Libraries: Social sciences ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers **Studies in Deceit** Hugh Hartshorne,1928 Democracy and the Claims of Nature Bob Pepperman Taylor,Ben A. Minteer,2002-04-16 In Democracy and the Claims of Nature the leading thinkers in

the fields of environmental political and social theory come together to discuss the tensions and sympathies of democratic ideals and environmental values The prominent contributors reflect upon where we stand in our understanding of the relationship between democracy and the claims of nature Democracy and the Claims of Nature bridges the gap between the often competing ideals of the two fields leading to a greater understanding of each for the other Salmon 2100 Robert T.
