Environments At Risks:

Assessment and Management of Environmental Risks: Cost-Efficient Methods and Applications Igor Linkov, José Palma-Oliveira, 2001-10-31 The management of environmental contamination requires decision makers to weigh existing risks against the potential effects of implementing environmental policies considering both the benefits and disruptions that may result from different courses of action The present book represents an major advance in the development and application of cost efficient methods of risk assessment especially under circumstances of budget constraints and in developing countries The book explores the potential of risk assessment to act as a unified and unifying technique for addressing a wide range of environmental problems A wide range of issues are discussed ranging from specific and local studies through global decision and management frameworks The approaches developed range from specific methods through widely applied public policies The book shows that the use of risk assessment can provide the scientific basis for environmentally sound cost effective policies strategies and solutions to our environmental challenges

Assessments of Regional and Global

Environmental Risks Alexander E. Farrell, Jill Professor Jäger, 2010-09-30 As environmental challenges grow larger in scale and implications it is increasingly important to apply the best scientific knowledge in the decisionmaking process Editors Farrell and J ger present environmental assessments as the bridge between the expert knowledge of scientists and engineers on the one hand and decisionmakers on the other When done well assessments have a positive impact on public policy the strategic decisions of private firms and ultimately the quality of life for many people This book is the result of an international interdisciplinary research project to analyze past environmental assessments and understand how their design influenced their effectiveness in bringing scientific evidence and insight into the decisionmaking process The case studies in the book feature a wide range of regional and global risks including ozone depletion transboundary air pollution and climate change Assessments of Regional and Global Environmental Risks offers several important contributions It provides a clear account of the choices faced in the design of environmental assessments and a clear description of the lessons learned from past assessments It illustrates why assessments are social processes not simply reports And while they identify no universal one size fits all design the authors find that to be effective environmental assessments must be viewed by those who produce and use them as being salient credible in their scientific support and legitimate or fair in design and execution

Environmental Risks and the Media Barbara Adam, Stuart Allan, Cynthia Carter, 2013-01-11 Environmental Risks and the Media explores the ways in which environmental risks threats and hazards are represented transformed and contested by the media At a time when popular conceptions of the environment as a stable natural world with which humanity interferes are being increasingly contested the medias methods of encouraging audiences to think about environmental risks from the BSE or mad cow crisis to global climate change are becoming more and more controversial Examining large scale disasters as well as everyday hazards the contributors consider the tensions between entertainment and information in media

coverage of the environment How do the media frame expert counter expert and lay public definitions of environmental risk What role do environmental pressure groups like Greenpeace or eco warriors and green guerrillas play in shaping what gets covered and how Does the media emphasis on spectacular events at the expense of issue sensitive reporting exacerbate the public tendency to overestimate sudden and violent risks and underestimate chronic long term ones *Environmental Risk* Albert R.
