Formal Object Oriented Specification Using Object Z:

Formal Object-oriented Specification Using Object-Z Roger Duke, Gordon Rose, 2000 This text presents techniques for the precise description of software or systems using the object oriented formal specification language Object Z It includes numerous and varied case studies to illustrate the techniques and language of object oriented formal specification and illustrates the key role of formal specification in formal verification and in implementation Although primarily intended for safety critical or complex software development formal specification also has wide application in hardware or general system description

The Object-Z Specification Language Graeme Smith, 2012-12-06 Object Z is an object oriented extension of the formal specification language Z It adds to Z notions of classes and objects and inheritance and polymorphism By extending Z's semantic basis it enables the specification of systems as collections of independent objects in which self and mutual referencing are possible The Object Z Specification Language presents a comprehensive description of Object Z including discussions of semantic issues definitions of all language constructs type rules and other rules of usage specification guidelines and a full concrete syntax It will enable you to confidently construct Object Z specifications and is intended as a reference manual to keep by your side as you use and learn to use Object Z The Object Z Specification Language is suitable as a textbook or as a secondary text for a graduate level course and as a reference for researchers and practitioners in industry

Refinement in Z and Object-Z John Derrick, Eerke A. Boiten, 2012-12-06 Refinement is one of the cornerstones of the formal approach to software engineering and its use in various domains has led to research on new applications and generalisation This book brings together this important research in one volume with the addition of examples drawn from different application areas It covers four main themes data refinement and its application to Z generalisations of refinement that change the interface and atomicity of operations refinement in Object Z and modelling state and behaviour by combining Object Z with CSP Refinement in Z and Object Z Foundations and Advanced Applications provides an invaluable overview of recent research for academic and industrial researchers lecturers teaching formal specification and development industrial practitioners using formal methods in their work and postgraduate and advanced undergraduate students

Z User Workshop, Cambridge 1994 J.P. Bowen, J.A. Hall, 2012-12-06 This volume contains papers from the Eighth Z User Meeting to be held at the University of Cambridge from 29-30 June 1994. The papers cover a wide range of issues associated with Z and formal methods with particular reference to practical application. These issues include education standards, tool support and interaction with other design paradigms such as consideration of real time and object oriented approaches to development. Among the actual topics covered are the formal specification in Z of Defence Standard 00 56, formal specification of telephone features, specifying and interpreting class hierarchies in Z and software quality assurance using the SAZ method. Z User Workshop Cambridge 1994 provides an important overview of current research into industrial applications of Z and will provide invaluable reading for researchers, postgraduate students and also potential industrial users of Z.

Enterprise Information Systems Joaquim Filipe, 2013-11-11 This book includes a set of selected papers from the first International Conference on Enterprise Information Systems ICEIS 99 held in Setúbal Portugal from 27 to 30 March 1999. ICEIS focuses on real world applications and aims at becoming a major point of contact between research scientists, engineers and practitioners in the area of business applications of information systems. This year four simultaneous tracks were held covering different aspects related to enterprise computing including Systems Analysis and Specification, Database Technology and its Applications, Artificial Intelligence and Decision Support Systems, and Internet and Intranet Computing. Although ICEIS 99 received more than 200 submissions, only 96 papers were accepted for oral presentation and only 24 were selected for inclusion in this book. These numbers demonstrate stringent quality criteria and the intention of maintaining a high quality forum for future editions of this conference. A number of additional keynote lectures, case studies and technical tutorials were also held. These presentations by specialists in different knowledge areas made an important contribution to increase the overall quality of the Conference and are partially expressed in the first two papers of the book.

Modern Mathematical Methods and High Performance Computing in Science and Technology Vinai K. Singh, H.M. Srivastava, Ezio Venturino, Michael Resch, Vijay Gupta, 2016-08-06 The book discusses important results in modern mathematical models and high performance computing such as applied operations research, simulation of operations, statistical modeling and applications, invisibility regions and regular meta materials, unmanned vehicles, modern radar techniques, SAR imaging, satellite remote sensing, coding and robotic systems. Furthermore, it is valuable as a reference work and as a basis for further study and research. All contributing authors are respected academicians, scientists and researchers from around the globe. All the papers were presented at the international conference on Modern Mathematical Methods and High Performance Computing in Science Technology M3HPCST 2015 held at Raj Kumar Goel Institute of Technology Ghaziabad, India from 27-29 December 2015 and peer reviewed by international experts. The conference provided an

exceptional platform for leading researchers academicians developers engineers and technocrats from a broad range of disciplines to meet and discuss state of the art mathematical methods and high performance computing in science technology solutions This has brought new prospects for collaboration across disciplines and ideas that facilitate novel breakthroughs

ZUM ... the Z Formal Specification Notation ,1998 *6th Refinement Workshop* David Till,2012-12-06 The Sixth Refinement Workshop took place at City University in London from 5th to 7th January 1994 The present volume includes all of the papers which were submitted and accepted for presentation together with two papers by invited speakers The workshops in the series have generally occurred at one year intervals but in this last case a two year period had elapsed These workshops have established themselves as an important event in the calendar for all those who are interested in progress in the underlying theory of refinement and in the take up by industry of the methods supported by that theory One of the proposed themes of the sixth workshop was the reporting of successful adoption in industry of rigorous software development methods The programme committee was perhaps slightly disappointed by the response from industry to the call in this respect However the recent period could be characterised as one of consolidation when those companies which have made the decision that formal development methods are important to their business have been adopting them where appropriate and finding them to be worthwhile On the other hand the difficult economic climate which exists in most parts of the developed world is perhaps not the context within which companies still dubious about the benefits are going to opt for making major changes in their working practices *Z User Workshop, London 1992* J.P. Bowen,J.E. Nicholls,2013-03-09 The Z notation has been developed at the Programming Research Group at the Oxford University Computing Laboratory and elsewhere for over a decade It is now used by industry as part of the software and hardware development process in both Europe and the USA It is currently undergoing BSI standardisation in the UK and has been proposed for ISO standardisation internationally In recent years researchers have begun to focus increasingly on the development of techniques and tools to encourage the wider application of Z and other formal methods and notations This volume contains papers from the Seventh Annual Z User Meeting held in London in December 1992 In contrast to previous years the meeting concentrated specifically on industrial applications of Z and a high proportion of the participants came from an industrial background The theme is well represented by the four invited papers Three of these discuss ways in which formal methods are being introduced and the fourth presents an international survey of industrial applications It also provides a reminder of the improvements which are needed to make these methods an accepted part of software development In addition the volume contains several submitted papers on the industrial use of Z two of which discuss the key area of safety critical applications There are also a number of papers related to the recently completed ZIP project The papers cover all the main areas of the project including methods tools and the development of a Z Standard the first publicly available version of which was made available at the meeting Finally the volume contains a select Z bibliography and section on how to access information on Z through comp
