Chicago Guide to Preparing Electronic Manuscripts University of Chicago. Press,1987 This guide to preparing manuscripts on computer offers authors and publishers practical assistance on how to use authors disks or tapes for typesetting When the thirteenth edition of The Chicago Manual of Style was published in 1982 the impact of personal computers on the publishing process had just begun to be felt This new book supplements information in the Chicago Manual by covering the rapidly changing subject of electronic manuscripts Since the early 1980s more and more authors have been producing manuscripts on computers and expecting their publishers to make use of the electronic version For a number of reasons including the proliferation of incompatible machines and software however publishers have not always found it easy to work with electronic manuscripts The University of Chicago Press has been doing so since 1981 and in this book passes on the results of six years experience with preparing such manuscripts and converting them to type **The Electronic Scholar** John Shelton Lawrence,1984 **Computer Applications in the Social Sciences** Edward E. Brent,Ronald E. Anderson,1990 Presenting an introduction to computing and advice on computer applications this book examines hardware and software with respect to the needs of the social scientist It offers a framework for the use of computers with focus on the work station the center of which is a personal computer connected to networks by a telephone based modem

Communicating Ideas Irving Louis Horowitz, Communicating Ideas is the first attempt to place publishing in America in its political and commercial setting The book addresses the political implications of scholarly communication in the era of the new computerized technology Horowitz does so by examining classic problems of political theory in the context of property rights versus the presumed right to know and the special strains involved in publishing as a business versus information as a public trust Offering a knowledgeable and insightful view of publishing in America and abroad this book makes an important contribution to the study of mass culture in advanced societies The discussion ranges considerably beyond scholarly publications into communication as a whole encompassing a wide range of issues from cable and satelite television control to specialized issues in copyright legislation the prize system in publishing and the definition of standards of the industry This new edition expanded by fully one third expands on such themes and in addition deals with Horowitz s new research on the history of social science publishing The first edition published in 1986 was described by WE Coleman as a marvelous book which indeed offers a realistic analysis of publishing John P Dessauer declared that no one thinking seriously about the future of scholarly communication can afford to ignore his work in particular his treatment of basic issues Joseph Gusfield Los Angeles Times in his review noted that Horowitz is alive to the possibilities and barriers for academics to reach a wider audience and for lay persons to utilize scholarship Both groups can learn much from this intelligent book And Philip G Altbach Scholarly Publishing concluded his review by saying that Communicating Ideas will be of interest not only to

publishers and editors but also to librarians and to sociologists of science **History Microcomputer Review** ,1995 **Microcomputers for Library Decision Making** Peter Hernon,Charles R.
