

# FIRST AID

## CHAIN OF SURVIVAL

The chain of survival is a series of actions, or links, that when put quickly in motion increase the odds of survival. If the chain is broken, or has a link missing, the odds of survival will be reduced.

1

### To prevent cardiac arrest

#### Early recognition and call for help

Recognise those at risk of cardiac arrest and call for help in the hope that early treatment can prevent arrest.

2

### To buy time

**Early CPR**  
Start CPR to buy time until medical help arrives.

4

### To restore quality of life

#### Post-resuscitation care

Care provided by the paramedics and the hospital.

3

### To restart the heart

**Early defibrillation**  
Defibrillators give an electric shock to reorganise the rhythm of the heart.

After suffering from a cardiac arrest, with each passing minute, a casualty's chance of survival diminishes roughly by 6-10%.
