provides citations to and excerpts of reviews of current juvenile and adult fiction and nonfiction in the English language. Reviews of the following types of books are excluded: government publications, textbooks, and technical books in the sciences and law. Reviews of books on science for the general reader, however, are included. The reviews originate in a group of selected periodicals in the humanities, social sciences, and general science published in the United States, Canada, and Great Britain. Publisher: **Book Review Index**, Dana Ferguson, 2001. Challenged Earth, Stephen F. Lincoln, 2006. This timely book provides a comprehensive insight into the challenges facing humanity and Earth in the 21st century. It opens with a discussion of the domination of all the continents and oceans by a growing human population. This is followed by an appraisal of the extent to which water and food supplies will be able to accommodate this population, which may reach eleven billion by 2100. The rapidly increasing ability to change biology and evolution through genomics is considered next, and complements a discussion of disease, which is viewed largely as an evolutionary struggle between humanity and pathogens. A seemingly insatiable demand for energy, future energy supplies, and the impact of their use on climate and attempts to ameliorate these effects are next examined. The book concludes with a discussion of the partial destruction of the ozone layer and the international effort to repair the damage. *Global Warming*, David Archer, 2012-04-13. Based on the author's highly successful undergraduate course taught at the University of Chicago, *Global Warming* presents the processes of climate change and climate stability. Drawing on a wide range of disciplines, this Second Edition not only summarizes scientific evidence but also presents economic and political issues related to global warming. **Rock Island Employees' Magazine**, 1929. **The Country Gentleman**, 1914.
