Hollywood in the Seventies Lester J. Keyser, 1981

The Chimpanzees of the Tai Forest Christophe Boesch, Hedwige Boesch-Achermann, 2000 The chimpanzees are the closest living evolutionary relatives to our own species *Homo sapiens* As such they have long exerted a fascination over those with an interest in human evolution and what makes humans unique

Chrisophe Boesch and Hedwige Boesch Acherman undertook an incredible observational study of a group of wild chimpanzees of the Tai forest in Cote D Ivoire spending some fifteen years in the West African jungle with them This fascinating book is the result of these years of painstaking research among the chimps Chimpanzee behaviour is documented here in all its impressive diversity and variety Aggression territoriality social structure and relationships reproductive strategies hunting tool use each of these is given its own chapter along with topics such as chimp intelligence life histories and demography The authors take care to place their observations within the broader context of research in behavioural ecology and to compare and contrast their findings with other important work on chimpanzee groups such as that by Jane Goodall The book concludes with a summary chapter relating the chimpanzee findings to our understanding of human evolution

Combining careful scientific observation with a store of entertaining anecdotes this is a lively and readable book It also succeeds in shedding light on some of the central questions around the evolutionary relationships between the primates and in particular the affinity between chimpanzees and humans This is a major contribution to the study of the great apes and a significant addition to debates about human ape evolution It has all the makings of a classic monograph

Chicano Prisoners R. Theodore Davidson, 1983 The author takes the reader from the world outside the walls of prison comprised of the officials homes with neatly groomed lawns to the prisoners world inside the walls with blocks of 11 by 4 5 foot cells of concrete and steel and treeless grassless concrete yards He succeeds in helping the reader understand why prisoners think and act as they do in their particular ecosphere
