An Essay Concerning Human Understanding is a work by John Locke concerning the foundation of human knowledge and understanding. It first appeared in 1689 although dated 1690 with the printed title *An Essay Concerning Humane Understanding*. He describes the mind at birth as a blank slate (*tabula rasa*) although he did not use those actual words filled later through experience. The essay was one of the principal sources of empiricism in modern philosophy and influenced many enlightenment philosophers such as David Hume and George Berkeley. Book I of the Essay is Locke's attempt to refute the rationalist notion of innate ideas. Book II sets out Locke's theory of ideas including his distinction between passively acquired simple ideas such as red, sweet, round, etc. and actively built complex ideas such as numbers, causes, and effects, abstract ideas, ideas of substances, identity, and diversity. Locke also distinguishes between the truly existing primary qualities of bodies like shape, motion, and the arrangement of minute particles and the secondary qualities that are powers to produce various sensations in us such as red and sweet. These secondary qualities, Locke claims, are dependent on the primary qualities. He also offers a theory of personal identity offering a largely psychological criterion. Book III is concerned with language and Book IV with knowledge including intuition, mathematics, moral philosophy, natural philosophy, science, faith, and opinion.

An Essay Concerning Human Understanding Volume 1 is a groundbreaking work by John Locke that explores the nature of human knowledge and understanding. In the book's first volume, Locke argues that the human mind is like a blank slate or *tabula rasa* at birth and that all knowledge is acquired through experience and observation. Locke delves into the mechanics of human perception and cognition, exploring the ways in which we acquire knowledge and form beliefs about the world around us. He argues that all knowledge is ultimately derived from sensory experience and that our understanding of the world is shaped by the way our minds process and interpret this sensory input. Throughout the book, Locke provides a rigorous and detailed analysis of the workings of the human mind, examining everything from the nature of ideas and concepts to the role of language and communication in shaping our understanding of the world. *An Essay Concerning Human Understanding* is a foundational work in the field of philosophy and continues to be studied and debated by scholars to this day.
