**Pathogenicity Islands and the Evolution of Pathogenic Microbes** J. Hacker, James Kaper, 2002-03-12 It has been known for a number of years that not only pathogenicity islands but also plasmids and bacteriophages are able to carry genes whose products are involved in pathogenic processes Accordingly such elements and their products play an important role in pathogenesis due to the intestinal E coli as well to Shigellae Another interesting aspect which is reflected in different articles is that genomes evolve by acquisition of new pieces of DNA following gene transfer but also by genome reduction Different mechanisms include the deletion of sequences or the elimination of functions by the accumulation of point mutations or rearrangements

Gram-Positive Pathogens Vincent A. Fischetti, Richard P. Novick, Joseph J. Ferretti, Daniel A. Portnoy, Miriam Braunstein, Julian I. Rood, 2019-10-01 Gram positive bacteria lacking an outer membrane and related secretory systems and having a thick peptidoglycan have developed novel approaches to pathogenesis by acquiring among others a unique family of surface proteins toxins enzymes and prophages For the new edition the editors have enhanced this fully researched compendium of Gram positive bacterial pathogens by including new data generated using genomic sequencing as well as the latest knowledge on Gram positive structure and mechanisms of antibiotic resistance and theories on the mechanisms of Gram positive bacterial pathogenicity This edition emphasizes streptococci staphylococci listeria and spore forming pathogens with chapters written by many of the leading researchers in these areas The chapters systematically dissect these organisms biologically genetically and immunologically in an attempt to understand the strategies used by these bacteria to cause human disease This textbook comprises a superb collection of scientific knowledge making it a must read for any graduate student medical doctor or investigator studying these gram positive bacteria and inspiring future imaginations of biological knowledge William R Jacobs Jr PhD Professor Microbiology Immunology Albert Einstein College of Medicine
