Scientific Inquiry Cycle: Review

Science helps us understand the world by developing knowledge and creating things that solve problems. Science is a way of thinking and working that helps us understand the world and solve problems. It is a process of asking questions, making observations, and testing ideas to find out how things work.

Designing solutions becomes a complex task when you consider various constraints, such as budget, time, and safety concerns. Identifying a problem is the first step in the scientific process. It involves recognizing a need or a question that can be investigated scientifically. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.
